GENERAL INFORMATION ABOUT THE TRUST

The Trust is an open-end management investment company consisting of multiple investment series. This SAI relates to the Saba Closed-End Funds ETF (the “Fund”). The Trust was organized as a Delaware statutory trust on April 4, 2012. The Trust is registered with the Securities and Exchange Commission (the “SEC”) under the Investment Company Act of 1940, as amended, (the “1940 Act”) as an open-end management investment company and the offering of the Fund’s shares is registered under the Securities Act of 1933, as amended (the “Securities Act”). Exchange Traded Concepts, LLC (the “Adviser”) serves as investment adviser to the Fund. Saba Capital Management, L.P. (the “Sub-Adviser”) serves as the sub-adviser to the Fund. The Fund is a diversified company within the meaning of the 1940 Act.

Each share issued by the Fund has a pro rata interest in the assets of the Fund. Shares have no preemptive, exchange, subscription or conversion rights and are freely transferable. Each share is entitled to participate equally in dividends and distributions declared by the Board of Trustees of the Trust (“Board”) with respect to the Fund, and in the net distributable assets of the Fund on liquidation. All payments received by the Trust for shares of the Fund belong to the Fund. The Fund has its own assets and liabilities.

The shares of the Fund are approved for listing on the Exchange. The shares of the Fund, as described in the Fund’s Prospectus, will trade on the Exchange at market prices that may be below, at, or above net asset value (“NAV”) per share of the Fund.

The Fund offers and issues shares at NAV in aggregated lots of at least 25,000 (each, a “Creation Unit” or a “Creation Unit Aggregation”), generally in exchange for: (i) a basket of individual securities (the “Deposit Securities”) and (ii) an amount of cash (the “Cash Component”). Shares are redeemable only in Creation Unit Aggregations and, generally, in exchange for portfolio securities and a specified cash payment.

The Trust reserves the right to offer an “all cash” option for creations and redemptions of Creation Units for the Fund. In addition, Creation Units may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain a cash deposit with the Trust at least equal to 105% of the market value of the missing Deposit Securities. In each instance, transaction fees may be imposed that will be higher than the transaction fees associated with traditional in-kind creations or redemptions. In all cases, such fees will be limited in accordance with SEC requirements applicable to management investment companies offering redeemable securities. See the “Creation and Redemption of Creation Units” section for detailed information.

ADDITIONAL INFORMATION ABOUT INVESTMENT OBJECTIVES, POLICIES AND RELATED RISKS

The Fund’s investment objective is to provide capital appreciation and dividend income. Because the Fund invests primarily in a portfolio of closed-end funds (the “Underlying Funds”), the Fund operates in a manner that is commonly referred to as a “fund of funds.” The Fund’s investment objective and principal investment strategies are described in the Prospectus. The following information supplements, and should be read in conjunction with, the Prospectus. For a description of certain permitted investments, see “Description of Permitted Investments” in this SAI.

DESCRIPTION OF PERMITTED INVESTMENTS

A discussion of the risks associated with an investment in the Fund is contained in the Fund’s Prospectus. The discussion below supplements, and should be read in conjunction with, these sections.

EQUITY SECURITIES

Equity securities represent ownership interests in a company and include common stocks, preferred stocks, warrants to acquire common stock, and securities convertible into common stock. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities will cause the net asset value of the Underlying Funds or the Fund to fluctuate.

Types of equity securities may invest:

Common Stocks. Common stocks represent units of ownership in a company. Common stocks usually carry voting rights and earn dividends. Unlike preferred stocks, which are described below, dividends on common stocks are not fixed but are declared at the discretion of the company's board of directors.

Preferred Stocks. Preferred stocks are also units of ownership in a company. Preferred stocks normally have preference over common stock in the payment of dividends and the liquidation of the company. However, in all other respects, preferred stocks are subordinated to the liabilities of the issuer. Unlike common stocks, preferred stocks are generally not entitled to vote on corporate matters. Types of preferred stocks include adjustable-rate preferred stock, fixed dividend preferred stock, perpetual preferred stock, and sinking fund preferred stock. Generally, the market values of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk.

Convertible Securities. Convertible securities are securities that may be exchanged for, converted into, or exercised to acquire a predetermined number of shares of the issuer's common stock at a fund's option during a specified time period (such as convertible preferred stocks, convertible debentures and warrants). A convertible security is generally a fixed income security that is senior to common stock in an issuer's capital structure, but is usually subordinated to similar non-convertible securities. In exchange for the conversion feature, many corporations will pay a lower rate of interest on convertible securities than debt securities of the same corporation. In general, the market value of a convertible security is at least the higher of its "investment value" (*i.e.*, its value as a fixed income security) or its "conversion value" (*i.e.*, its value upon conversion into its underlying common stock).

Convertible securities are subject to the same risks as similar securities without the convertible feature. The price of a convertible security is more volatile during times of steady interest rates than other types of debt securities. The price of a convertible security tends to increase as the market value of the underlying stock rises, whereas it tends to decrease as the market value of the underlying common stock declines.

Rights and Warrants. A right is a privilege granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock before it is issued. Rights normally have a short life of usually two to four weeks, are freely transferable and entitle the holder to buy the new common stock at a lower price than the public offering price. Warrants are securities that are usually issued together with a debt security or preferred stock and that give the holder the right to buy proportionate amount of common stock at a specified price. Warrants are freely transferable and are traded on major exchanges. Unlike rights, warrants normally have a life that is measured in years and entitles the holder to buy common stock of a company at a price that is usually higher than the market price at the time the warrant is issued. Corporations often issue warrants to make the accompanying debt security more attractive.

An investment in warrants and rights may entail greater risks than certain other types of investments. Generally, rights and warrants do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, their value does not necessarily change with the value of the underlying securities, and they cease

to have value if they are not exercised on or before their expiration date. Investing in rights and warrants increases the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

Master Limited Partnerships (“MLPs”). MLPs are limited partnerships or limited liability companies, whose partnership units or limited liability interests are listed and traded on a U.S. securities exchange, and are treated as publicly traded partnerships for federal income tax purposes. To qualify to be treated as a partnership for tax purposes, an MLP must receive at least 90% of its income from qualifying sources as set forth in Section 7704(d) of the Internal Revenue Code. These qualifying sources include activities such as the exploration, development, mining, production, processing, refining, transportation, storage and marketing of mineral or natural resources. MLPs generally have two classes of owners, the general partner and limited partners. MLPs that are formed as limited liability companies generally have two analogous classes of owners, the managing member and the members. For purposes of this section, references to general partners also apply to managing members and references to limited partners also apply to members. The general partner is typically owned by a major energy company, an investment fund, the direct management of the MLP or is an entity owned by one or more of such parties. The general partner may be structured as a private or publicly traded corporation or other entity. The general partner typically controls the operations and management of the MLP through an equity interest of as much as 2% in the MLP plus, in many cases, ownership of common units and subordinated units. Limited partners own the remainder of the MLP through ownership of common units and have a limited role in the MLP's operations and management.

MLPs are typically structured such that common units and general partner interests have first priority to receive quarterly cash distributions up to an established minimum amount (“minimum quarterly distributions” or “MQD”). Common and general partner interests also accrue arrearages in distributions to the extent the MQD is not paid. Once common and general partner interests have been paid, subordinated units receive distributions of up to the MQD; however, subordinated units do not accrue arrearages. Distributable cash in excess of the MQD paid to both common and subordinated units is distributed to both common and subordinated units generally on a pro rata basis. The general partner is also eligible to receive incentive distributions if the general partner operates the business in a manner which results in distributions paid per common unit surpassing specified target levels. As the general partner increases cash distributions to the limited partners, the general partner receives an increasingly higher percentage of the incremental cash distributions. A common arrangement provides that the general partner can reach a tier where it receives 50% of every incremental dollar paid to common and subordinated unit holders. These incentive distributions encourage the general partner to streamline costs, increase capital expenditures and acquire assets in order to increase the partnership's cash flow and raise the quarterly cash distribution in order to reach higher tiers.

General partner interests of MLPs are typically retained by an MLP's original sponsors, such as its founders, corporate partners, entities that sell assets to the MLP and investors such as us. A holder of general partner interests can be liable under certain circumstances for amounts greater than the amount of the holder's investment in the general partner interest. General partner interests often confer direct board participation rights and in many cases, operating control, over the MLP. These interests themselves are not publicly traded, although they may be owned by publicly traded entities. General partner interests receive cash distributions, typically 2% of the MLP's aggregate cash distributions, which are contractually defined in the partnership agreement. In addition, holders of general partner interests typically hold incentive distribution rights (“IDRs”), which provide them with a larger share of the aggregate MLP cash distributions as the distributions to limited partner unit holders are increased to prescribed levels. General partner interests generally cannot be converted into common units. The general partner interest can be redeemed by the MLP if the MLP unitholders choose to remove the general partner, typically with a supermajority vote by limited partner unitholders.

Royalty Trusts. A royalty trust generally acquires an interest in natural resource companies or chemical companies and distributes the income it receives to the investors of the royalty trust. A sustained decline in demand for crude oil, natural gas and refined petroleum products could adversely affect income and royalty trust revenues and cash flows. Factors that could lead to a decrease in market demand include a recession or other adverse economic conditions, an increase in the market price of the underlying commodity, higher taxes or other regulatory actions that increase costs, or a shift in consumer demand for such products. A rising interest rate environment could adversely impact the performance of royalty trusts. Rising interest rates could limit the capital appreciation of royalty trusts because of the increased availability of alternative investments at more competitive yields.

Risks of Investing in Equity Securities:

General Risks of Investing in Stocks - While investing in stocks allows investors to participate in the benefits of owning a company, such investors must accept the risks of ownership. Unlike bondholders, who have preference to a company's earnings and cash flow, preferred stockholders, followed by common stockholders in order of priority, are entitled only to the residual amount after a company meets its other obligations. For this reason, the value of a company's stock will usually react more strongly to actual or perceived changes in the company's financial condition or prospects than its debt obligations. Stockholders of a company that fares poorly can lose money.

Stock markets tend to move in cycles with short or extended periods of rising and falling stock prices. The value of a company's stock may fall because of:

- Factors that directly relate to that company, such as decisions made by its management or lower demand for the company's products or services;
- Factors affecting an entire industry, such as increases in production costs; and
- Changes in general financial market conditions that are relatively unrelated to the company or its industry, such as changes in interest rates, currency exchange rates or inflation rates.

Because preferred stock is generally junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics.

Small- and Medium-Sized Companies - Investors in small- and medium-sized companies typically take on greater risk and price volatility than they would by investing in larger, more established companies. This increased risk may be due to the greater business risks of their small or medium size, limited markets and financial resources, narrow product lines and frequent lack of management depth. The securities of small- and medium-sized companies are often traded in the over-the-counter market and might not be traded in volumes typical of securities traded on a national securities exchange. Thus, the securities of small and medium capitalization companies are likely to be less liquid, and subject to more abrupt or erratic market movements, than securities of larger, more established companies.

DEBT-RELATED INVESTMENTS

Debt securities include securities issued or guaranteed by the U.S. Government, its agencies, instrumentalities, and political subdivisions, foreign governments, their authorities, agencies, instrumentalities, and political subdivisions, supra-national agencies, corporate debt securities, master-demand notes, Yankee dollar and Eurodollar bank certificates of deposit, time deposits, bankers' acceptances, commercial paper and other notes, inflation-indexed securities, and other debt securities. Debt securities may be investment grade securities or high yield securities, which are described below.

Debt and other fixed income securities include fixed and floating rate securities of any maturity. Fixed rate securities pay a specified rate of interest or dividends. Floating rate securities pay a rate that is adjusted periodically by reference to a specified index or market rate. Fixed and floating rate securities include securities issued by federal, state, local, and foreign governments and related agencies, and by a wide range of private issuers, and generally are referred to in this SAI as “fixed income securities.” Indexed bonds are a type of fixed income security whose principal value and/or interest rate is adjusted periodically according to a specified instrument, index, or other statistic (*e.g.*, another security, inflation index, currency, or commodity).

Holders of fixed income securities are exposed to both market and credit risk. Market risk (or “interest rate risk”) relates to changes in a security’s value as a result of changes in interest rates. In general, the values of fixed income securities increase when interest rates fall and decrease when interest rates rise. Given the historically low interest rate environment, risks associated with rising rates are heightened. Credit risk relates to the ability of an issuer to make payments of principal and interest. Obligations of issuers are subject to bankruptcy, insolvency and other laws that affect the rights and remedies of creditors.

Because interest rates vary, the future income of a fund that invests in fixed income securities cannot be predicted with certainty. The future income of a fund that invests in indexed securities also will be affected by changes in those securities’ indices over time (*e.g.*, changes in inflation rates, currency rates, or commodity prices).

Bonds. A bond is an interest-bearing security issued by a company, governmental unit or, in some cases, a non-U.S. entity. The issuer of a bond has a contractual obligation to pay interest at a stated rate on specific dates and to repay principal (the bond's face value) periodically or on a specified maturity date. Bonds generally are used by corporations and governments to borrow money from investors.

An issuer may have the right to redeem or “call” a bond before maturity, in which case the investor may have to reinvest the proceeds at lower market rates. Most bonds bear interest income at a “coupon” rate that is fixed for the life of the bond. The value of a fixed-rate bond usually rises when market interest rates fall and falls when market interest rates rise. Accordingly, a fixed-rate bond's yield (income as a percent of the bond's current value) may differ from its coupon rate as its value rises or falls. Other types of bonds bear income at an interest rate that is adjusted periodically. Because of their adjustable interest rates, the value of “floating-rate” or “variable-rate” bonds fluctuates much less in response to market interest rate movements than the value of fixed-rate bonds. Generally, prices of higher quality issues tend to fluctuate less with changes in market interest rates than prices of lower quality issues and prices of longer maturity issues tend to fluctuate more than prices of shorter maturity issues. Bonds may be senior or subordinated obligations. Senior obligations generally have the first claim on a corporation's earnings and assets and, in the event of liquidation, are paid before subordinated obligations. Bonds may be unsecured (backed only by the issuer's general creditworthiness) or secured (backed by specified collateral).

The investment return of corporate bonds reflects interest on the security and changes in the market value of the security. The market value of a corporate bond may be affected by the credit rating of the corporation, the corporation's performance and perceptions of the corporation in the market place. There is a risk that the issuers of the bonds may not be able to meet their obligations on interest or principal payments at the time called for by the bond.

Asset-Backed Securities. Asset-backed securities (“ABS”) are bonds backed by pools of loans or other receivables. ABS are created from many types of assets, including auto loans, credit card receivables, home equity loans, and student loans. ABS are issued through special purpose vehicles that are bankruptcy remote from the issuer of the collateral. The credit quality of an ABS transaction depends on the

performance of the underlying assets. To protect ABS investors from the possibility that some borrowers could miss payments or even default on their loans, ABS include various forms of credit enhancement.

Some ABS, particularly home equity loan transactions, are subject to interest-rate risk and prepayment risk. A change in interest rates can affect the pace of payments on the underlying loans, which in turn affects total return on the securities. ABS also carry credit or default risk. If many borrowers on the underlying loans default, losses could exceed the credit enhancement level and result in losses to investors in an ABS transaction. Finally, ABS have structure risk due to a unique characteristic known as early amortization, or early payout, risk. Built into the structure of most ABS are triggers for early payout, designed to protect investors from losses. These triggers are unique to each transaction and can include: a big rise in defaults on the underlying loans, a sharp drop in the credit enhancement level, or even the bankruptcy of the originator. Once early amortization begins, all incoming loan payments are used to pay investors as quickly as possible.

Mortgage-Related and Other Asset-Backed Securities. Mortgage-related securities include mortgage pass-through securities, collateralized mortgage obligations (“CMOs”), commercial mortgage-backed securities, mortgage dollar rolls, CMO residuals, stripped mortgage-backed securities (“SMBSs”) and other securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property. The value of some mortgage- or asset-backed securities may be particularly sensitive to changes in prevailing interest rates. Early repayment of principal on some mortgage-related securities may expose the Underlying Fund to a lower rate of return upon reinvestment of principal. When interest rates rise, the value of a mortgage-related security generally will decline; however, when interest rates are declining, the value of mortgage-related securities with prepayment features may not increase as much as other fixed income securities. The rate of prepayments on underlying mortgages will affect the price and volatility of a mortgage-related security, and may shorten or extend the effective maturity of the security beyond what was anticipated at the time of purchase. If unanticipated rates of prepayment on underlying mortgages increase the effective maturity of a mortgage-related security, the volatility of the security can be expected to increase. The value of these securities may fluctuate in response to the market’s perception of the creditworthiness of the issuers. Additionally, although mortgages and mortgage-related securities are generally supported by some form of government or private guarantee and/or insurance, there is no assurance that private guarantors or insurers will meet their obligations.

One type of SMBS has one class receiving all of the interest from the mortgage assets (the interest-only, or “IO” class), while the other class will receive all of the principal (the principal only, or “PO” class). The yield to maturity on an IO class is extremely sensitive to the rate of principal payments (including prepayments) on the underlying mortgage assets, and a rapid rate of principal payments may have a material adverse effect on the Underlying Fund’s yield to maturity from these securities. The Underlying Fund may invest in other asset-backed securities that have been offered to investors.

Other mortgage-related securities include securities other than those described above that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property, including mortgage dollar rolls, CMO residuals or SMBSs. Other mortgage-related securities may be equity or debt securities issued by agencies or instrumentalities of the U.S. Government or by private originators of, or investors in, mortgage loans, including savings and loan associations, homebuilders, mortgage banks, commercial banks, investment banks, partnerships, trusts and special purpose entities of the foregoing.

High Yield Debt Securities. High yield debt securities are rated below investment grade (or are unrated but of equivalent investment quality) and commonly known as “junk bonds.” Investment in high yield debt securities generally provides greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and credit risk.

These high yield debt securities are regarded as predominantly speculative with respect to the issuer's continuing ability to meet principal and interest payments. Analysis of the creditworthiness of issuers of debt securities that are high yield may be more complex than for issuers of higher quality debt securities. In addition, high yield debt securities often are issued by smaller, less creditworthy companies or by highly leveraged (indebted) firms, which generally are less able than more financially stable firms to make scheduled payments of interest and principal. The risks posed by securities issued under such circumstances are substantial.

Investing in high yield debt securities involves risks that are greater than the risks of investing in higher quality debt securities. These risks include: (i) changes in credit status, including weaker overall credit conditions of issuers and risks of default; (ii) industry, market and economic risk; and (iii) greater price variability and credit risks of certain high yield debt securities such as zero coupon and payment-in-kind securities. While these risks provide the opportunity for maximizing return over time, they may result in greater volatility of the value of an Underlying Fund than a fund that invests in higher-rated securities.

Furthermore, the value of high yield securities may be more susceptible to real or perceived adverse economic, company or industry conditions than is the case for higher quality securities. The market values of certain of these lower-rated debt securities tend to reflect individual corporate developments to a greater extent than do higher-rated securities, which react primarily to fluctuations in the general level of interest rates, and tend to be more sensitive to economic conditions than are higher-rated securities. Adverse market, credit or economic conditions could make it difficult at certain times to sell certain high yield debt securities held by an Underlying Fund.

The secondary market on which high yield debt securities are traded may be less liquid than the market for higher grade securities. Less liquidity in the secondary trading market could adversely affect the price at which an Underlying Fund could sell a high yield debt security, and could adversely affect the daily net asset value ("NAV") per share of the Underlying Fund. When secondary markets for high yield debt securities are less liquid than the market for higher grade securities, it may be more difficult to value the securities because there is less reliable, objective data available.

The use of credit ratings as a principal method of selecting high yield debt securities can involve certain risks. For example, credit ratings evaluate the safety of principal and interest payments, not the market value risk of high yield debt securities. Also, credit rating agencies may fail to change credit ratings in a timely fashion to reflect events since the security was last rated.

Loans. Loans consist generally of obligations of companies and other entities (collectively, "borrowers") incurred for the purpose of reorganizing the assets and liabilities of a borrower; acquiring another company; taking over control of a company (leveraged buyout); temporary refinancing; or financing internal growth or other general business purposes. Loans often are obligations of borrowers who have incurred a significant percentage of debt compared to equity issued and thus are highly leveraged.

Loans may be acquired by direct investment as a lender at the inception of the loan or by assignment of a portion of a loan previously made to a different lender or by purchase of a participation interest. If an Underlying Fund makes a direct investment in a loan as one of the lenders, it generally acquires the loan at par. This means the Underlying Fund receives a return at the full interest rate for the loan. If the Underlying Fund acquires its interest in loans in the secondary market or acquires a participation interest, the loans may be purchased or sold above, at, or below par, which can result in a yield that is below, equal to, or above the stated interest rate of the loan.

When an Underlying Fund acts as one of a group of lenders originating a senior loan, it may participate in structuring the senior loan and have a direct contractual relationship with the borrower, may enforce

compliance by the borrower with the terms of the loan agreement and may have rights with respect to any funds acquired by other lenders through set-offs. Lenders also have full voting and consent rights under the applicable loan agreement. Action subject to lender vote or consent generally requires the vote or consent of the holders of some specified percentage of the outstanding principal amount of the senior loan. Certain decisions, such as reducing the amount of interest on or principal of a senior loan, releasing collateral, changing the maturity of a senior loan or a change in control of the borrower, frequently require the unanimous vote or consent of all lenders affected.

When an Underlying Fund is a purchaser of an assignment, it succeeds to all the rights and obligations under the loan agreement of the assigning lender and becomes a lender under the loan agreement with the same rights and obligations as the assigning lender. These rights include the ability to vote along with the other lenders on such matters as enforcing the terms of the loan agreement (*e.g.*, declaring defaults, initiating collection action, etc.). Taking such actions typically requires at least a vote of the lenders holding a majority of the investment in the loan and may require a vote by lenders holding two-thirds or more of the investment in the loan. When an Underlying Fund does not hold a majority of the investment in any loan, it will not be able by itself to control decisions that require a vote by the lenders. Assignments may be arranged through private negotiations and the rights and obligations acquired by the purchase of an assignment may differ from, and be more limited than, those held by the assigning lender.

A participation interest represents a fractional interest in a loan held by the lender selling the Underlying Fund the participation interest. In the case of participations, the Underlying Fund will not have any direct contractual relationship with the borrower, the Underlying Fund's rights to consent to modifications of the loan are limited and it is dependent upon the participating lender to enforce the Underlying Fund's rights upon a default. The Underlying Fund will have the right to receive payments of principal, interest, and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the borrower.

The Underlying Fund may be subject to the credit of both the agent and the lender from whom the Underlying Fund acquires a participation interest. These credit risks may include delay in receiving payments of principal and interest paid by the borrower to the agent or, in the case of a participation, offsets by the lender's regulator against payments received from the borrower. In the event of the borrower's bankruptcy, the borrower's obligation to repay the loan may be subject to defenses that the borrower can assert as a result of improper conduct by the agent.

Historically, the amount of public information available about a specific loan has been less extensive than if the loan were registered or exchange-traded.

The loans in which an Underlying Fund may invest in may be secured and senior to other indebtedness of the borrower. Each loan generally will be secured by collateral such as accounts receivable, inventory, equipment, real estate, intangible assets such as trademarks, copyrights and patents, and securities of subsidiaries or affiliates. Collateral also may include guarantees or other credit support by affiliates of the borrower. The value of the collateral generally will be determined by reference to financial statements of the borrower, by an independent appraisal, by obtaining the market value of such collateral, in the case of cash or securities if readily ascertainable, or by other customary valuation techniques considered appropriate by an Underlying Fund's investment adviser. The value of collateral may decline after the Underlying Fund's investment, and collateral may be difficult to sell in the event of default. Consequently, the Underlying Fund may not receive all the payments to which it is entitled. The loan agreement may or may not require the borrower to pledge additional collateral to secure the senior loan if the value of the initial collateral declines. In certain circumstances, the loan agreement may authorize the agent to liquidate the collateral and to distribute the liquidation proceeds pro rata among the lenders. By virtue of their senior position and collateral, senior loans typically provide lenders with the first right to cash flows or proceeds

from the sale of a borrower's collateral if the borrower becomes insolvent (subject to the limitations of bankruptcy law, which may provide higher priority to certain claims such as employee salaries, employee pensions, and taxes). This means senior loans generally are repaid before unsecured bank loans, corporate bonds, subordinated debt, trade creditors, and preferred or common stockholders. To the extent that the Underlying Fund invests in unsecured loans, if the borrower defaults on such loan, there is no specific collateral on which the lender can foreclose. If the borrower defaults on a subordinated loan, the collateral may not be sufficient to cover both the senior and subordinated loans. In addition, if the loan is foreclosed, the Underlying Fund could become part owner of any collateral and could bear the costs and liabilities of owning and disposing of the collateral.

An Underlying Fund may purchase and retain in its portfolio senior loans of borrowers that have filed for protection under the federal bankruptcy laws or that have had involuntary bankruptcy petitions filed against them by creditors. Investing in senior loans involves investment risk, and some borrowers default on their senior loan payments.

Senior loans typically pay interest at least quarterly at rates which equal a fixed percentage spread over a base rate such as the London Inter-Bank Offered Rate ("LIBOR"). For example, if LIBOR were 3% and the borrower was paying a fixed spread of 2.50%, the total interest rate paid by the borrower would be 5.50%.

Although a base rate such as LIBOR can change every day, loan agreements for senior loans typically allow the borrower the ability to choose how often the base rate for its loan will change. A single loan may have multiple reset periods at the same time, with each reset period applicable to a designated portion of the loan. Such periods can range from one day to one year, with most borrowers choosing monthly or quarterly reset periods. During periods of rising interest rates, borrowers will tend to choose longer reset periods, and during periods of declining interest rates, borrowers will tend to choose shorter reset periods. The fixed spread over the base rate on a senior loan typically does not change.

Senior loans usually have mandatory and optional prepayment provisions. Because of prepayments, the actual remaining maturity of senior loans may be considerably less than their stated maturity.

Senior loans generally are arranged through private negotiations between a borrower and several financial institutions represented by an agent who is usually one of the originating lenders. In larger transactions, it is common to have several agents; however, generally only one such agent has primary responsibility for ongoing administration of a senior loan. Agents typically are paid fees by the borrower for their services.

The agent is responsible primarily for negotiating the loan agreement which establishes the terms and conditions of the senior loan and the rights of the borrower and the lenders. The agent is paid a fee by the borrower for its services. The agent generally is required to administer and manage the senior loan on behalf of other lenders. The agent also is responsible for monitoring collateral and for exercising remedies available to the lenders such as foreclosure upon collateral. The agent may rely on independent appraisals of specific collateral. The agent need not, however, obtain an independent appraisal of assets pledged as collateral in all cases. The agent generally also is responsible for determining that the lenders have obtained a perfected security interest in the collateral securing a senior loan. An Underlying Fund will normally rely on the agent to collect principal of and interest on a senior loan. The Underlying Fund also relies in part on the agent to monitor compliance by the borrower with the restrictive covenants in the loan agreement and to notify the Underlying Fund (or the lender from whom the Underlying Fund has purchased a participation) of any adverse change in the borrower's financial condition. Insolvency of the agent or other persons positioned between the Underlying Fund and the borrower could result in losses for the Underlying Fund.

Loan agreements may provide for the termination of the agent's agency status in the event that it fails to act as required under the relevant loan agreement, becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership or, if not FDIC insured, enters into bankruptcy. Should such an agent, lender or assignor, with respect to an assignment interpositioned between an Underlying Fund and the borrower, become insolvent or enter FDIC receivership or bankruptcy, any interest in the senior loan of such person and any loan payment held by such person for the benefit of the Underlying Fund should not be included in such person's or entity's bankruptcy estate. If, however, any such amount were included in such person's or entity's bankruptcy estate, the Underlying Fund would incur certain costs and delays in realizing payment or could suffer a loss of principal or interest. In this event, the Underlying Fund could experience a decrease in its NAV.

Most borrowers pay their debts from cash flow generated by their businesses. If a borrower's cash flow is insufficient to pay its debts, it may attempt to restructure its debts rather than sell collateral. Borrowers may try to restructure their debts by filing for protection under the federal bankruptcy laws or negotiating a work-out. If a borrower becomes involved in a bankruptcy proceeding, access to collateral may be limited by bankruptcy and other laws. If a court decides that access to collateral is limited or void, the Underlying Fund may not recover the full amount of principal and interest that is due.

A borrower must comply with certain restrictive covenants contained in the loan agreement. In addition to requiring the scheduled payment of principal and interest, these covenants may include restrictions on the payment of dividends and other distributions to the borrower's shareholders, provisions requiring compliance with specific financial ratios, and limits on total indebtedness. The agreement also may require the prepayment of the loans from excess cash flow. A breach of a covenant that is not waived by the agent (or lenders directly) is normally an event of default, which provides the agent and lenders the right to call for repayment of the outstanding loan.

In the process of buying, selling and holding senior loans, an Underlying Fund may receive and/or pay certain fees. These fees are in addition to interest payments received and may include facility fees, commitment fees, commissions and prepayment penalty fees. Facility fees are paid to lenders when a senior loan is originated. Commitment fees are paid to lenders on an ongoing basis based on the unused portion of a senior loan commitment. Lenders may receive prepayment penalties when a borrower prepays a senior loan. Whether the Underlying Fund receives a facility fee in the case of an assignment, or any fees in the case of a participation, depends on negotiations between the Underlying Fund and the lender selling such interests. When the Underlying Fund buys an assignment, it may be required to pay a fee to the lender selling the assignment, or to forgo a portion of interest and fees payable to the Underlying Fund. Occasionally, the assignor pays a fee to the assignee. A person selling a participation to the Underlying Fund may deduct a portion of the interest and any fees payable to the Underlying Fund as an administrative fee.

Notwithstanding its intention in certain situations not to receive material, non-public information with respect to its management of investments in loans, an Underlying Fund's investment adviser may from time to time come into possession of material, non-public information about the issuers of loans that may be held in the Underlying Fund's portfolio. Possession of such information may in some instances occur despite the investment adviser's efforts to avoid such possession, but in other instances the investment adviser may choose to receive such information (for example, in connection with participation in a creditors' committee with respect to a financially distressed issuer). The investment adviser's ability to trade in these loans for the account of the Underlying Fund could potentially be limited by its possession of such information. Such limitations on the investment adviser's ability to trade could have an adverse effect on the Underlying Fund by, for example, preventing the Underlying Fund from selling a loan that is experiencing a material decline in value. In some instances, these trading restrictions could continue in effect for a substantial period of time.

An increase in demand for loans may benefit the Underlying Fund by providing increased liquidity for such loans and higher sales prices, but it also may adversely affect the rate of interest payable on such loans acquired by the Underlying Fund and the rights provided to the Underlying Fund under the terms of the applicable loan agreement, and may increase the price of loans that the Underlying Fund wishes to purchase in the secondary market. A decrease in the demand for loans may adversely affect the price of loans in the Underlying Fund's portfolio, which could cause the Underlying Fund's NAV to decline.

An Underlying Fund may sell loans it holds by way of an assignment but may at any time facilitate its ability to fund redemption requests by selling participation interests in such loans. An Underlying Fund may be required to pass along to a person that buys a loan from the Underlying Fund by way of assignment or participation interest a portion of any fees to which the Underlying Fund is entitled.

Municipal Securities. Certain Underlying Funds may invest in securities issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. Municipal securities share the attributes of debt/fixed-income securities in general, but generally are issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. The municipal securities which the Underlying Funds may purchase include general obligation bonds and limited obligation bonds (or revenue bonds), including industrial development bonds issued pursuant to former federal tax law that pay interest monthly or quarterly based on a floating rate that is reset daily or weekly based on an index of short-term municipal rates. General obligation bonds are obligations involving the credit of an issuer possessing taxing power and are payable from such issuer's general revenues and not from any particular source. Limited obligation bonds are payable only from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source. Industrial development bonds also generally are revenue bonds and thus are not payable from the issuer's general revenues. The credit and quality of industrial development bonds usually are related to the credit of the corporate user of the facilities. Payment of interest on and repayment of principal of such bonds is the responsibility of the corporate user (and/or any guarantor). In addition, certain Underlying Funds may invest in lease obligations. Lease obligations may take the form of a lease or an installment purchase contract issued by public authorities to acquire a wide variety of equipment and facilities.

An investment in these Underlying Funds should be made with an understanding of the risks inherent in an investment in municipal securities. An issuer may have the right to redeem or "call" a bond before maturity, in which case the investor may have to reinvest the proceeds at lower market rates. The value of a fixed rate bond usually rises when market interest rates fall and falls when market interest rates rise. Accordingly, a fixed rate bond's yield (income as a percent of the bond's current value) may differ from its coupon rate as its value rises or falls.

Generally, prices of higher quality issues tend to fluctuate more with changes in market interest rates than prices of lower quality issues and prices of longer maturity issues tend to fluctuate more than prices of shorter maturity issues. Bonds may be senior or subordinated obligations. Senior obligations generally have the first claim on a corporation's earnings and assets and, in the event of liquidation, are paid before subordinated obligations. Bonds may be unsecured (backed only by the issuer's general creditworthiness) or secured (also backed by specified collateral).

The market for municipal bonds may be less liquid than for non-municipal bonds. There also may be less information available on the financial condition of issuers of municipal securities than for public corporations. This means that it may be harder to buy and sell municipal securities, especially on short notice, and municipal securities may be more difficult for the Underlying Funds to value accurately than securities of public corporations. Since certain Underlying Funds may invest a significant portion of their portfolio in municipal securities, each such Underlying Fund's portfolio may have greater exposure to

liquidity risk than a fund that invests in non-municipal securities.

Some longer-term municipal securities give the investor the right to “put” or sell the security at par (face value) within a specified number of days following the investor's request—usually one to seven days. This demand feature enhances a security's liquidity by shortening its effective maturity and enables it to trade at a price equal to or very close to par. If a demand feature terminates prior to being exercised, an Underlying Fund would hold the longer-term security, which could experience substantially more volatility.

Municipal securities are subject to credit and market risk. Generally, prices of higher quality issues tend to fluctuate more with changes in market interest rates than prices of lower quality issues and prices of longer maturity issues tend to fluctuate more than prices of shorter maturity issues.

Prices and yields on municipal securities are dependent on a variety of factors, including general money market conditions, the financial condition of the issuer, general conditions of the municipal security market, the size of a particular offering, the maturity of the obligation and the rating of the issue. A number of these factors, including the ratings of particular issues, are subject to change from time to time.

Lease obligations may have risks normally not associated with general obligation or other revenue bonds. Leases and installment purchase or conditional sale contracts (which may provide for title to the leased asset to pass eventually to the issuer) have developed as a means for governmental issuers to acquire property and equipment without the necessity of complying with the constitutional statutory requirements generally applicable for the issuance of debt. Certain lease obligations contain “non-appropriation” clauses that provide that the governmental issuer has no obligation to make future payments under the lease or contract unless money is appropriated for that purpose by the appropriate legislative body on an annual or other periodic basis. Consequently, continued lease payments on those lease obligations containing “non-appropriation” clauses are dependent on future legislative actions. If these legislative actions do not occur, the holders of the lease obligation may experience difficulty in exercising their rights, including disposition of the property.

The value of municipal securities may be affected by uncertainties in the municipal market related to legislation or litigation involving the taxation of municipal securities or the rights of municipal securities holders in the event of a bankruptcy. Proposals to restrict or eliminate the federal income tax exemption for interest on municipal securities are introduced before Congress from time to time. Proposals also may be introduced before state legislatures that would affect the state tax treatment of a municipal fund's distributions. If such proposals were enacted, the availability of municipal securities and the value of a municipal fund's holdings would be affected, and the investment objective and policies of certain Underlying Funds might need to be reevaluated. Municipal bankruptcies are relatively rare, and certain provisions of the U.S. Bankruptcy Code governing such bankruptcies are unclear and remain untested. Further, the application of state law to municipal issuers could produce varying results among the states or among municipal securities issuers within a state. These legal uncertainties could affect the municipal securities market generally, certain specific segments of the market, or the relative credit quality of particular securities. There also is the possibility that as a result of litigation or other conditions, the power or ability of issuers to meet their obligations for the payment of interest and principal on their municipal securities may be materially affected or their obligations may be found to be invalid or unenforceable. Such litigation or conditions may, from time to time, have the effect of introducing uncertainties in the market for municipal securities or certain segments thereof, or of materially affecting the credit risk with respect to particular bonds. Adverse economic, business, legal or political developments might affect all or a substantial portion of the Underlying Funds' municipal securities in the same manner. Any of these effects could have a significant impact on the prices of some or all of the municipal securities held by the Underlying Funds.

There is no guarantee that any of the Underlying Fund's income will be exempt from federal or state income taxes. Events occurring after the date of issuance of a municipal bond or after the Underlying Fund's acquisition of a municipal bond may result in a determination that interest on that bond is includible in gross income for federal income tax purposes retroactively to its date of issuance. Such a determination may cause a portion of prior distributions by the Underlying Fund to its shareholders to be taxable to those shareholders in the year of receipt. Federal or state changes in income or alternative minimum tax ("AMT") rates or in the tax treatment of municipal bonds may make municipal bonds less attractive as investments and cause them to lose value.

Municipal Insurance. A municipal security may be covered by insurance that guarantees the bond's scheduled payment of interest and repayment of principal. This type of insurance may be obtained by either (i) the issuer at the time the bond is issued (primary market insurance), or (ii) another party after the bond has been issued (secondary market insurance).

Both primary and secondary market insurance guarantee timely and scheduled repayment of all principal and payment of all interest on a municipal security in the event of default by the issuer and cover a municipal security to its maturity, thereby enhancing its credit quality and value.

Municipal security insurance does not insure against market fluctuations or fluctuations in an Underlying Fund's Share price. In addition, a municipal security insurance policy will not cover: (i) repayment of a municipal security before maturity (redemption), (ii) prepayment or payment of an acceleration premium (except for a mandatory sinking fund redemption) or any other provision of a bond indenture that advances the maturity of the bond, or (iii) nonpayment of principal or interest caused by negligence or bankruptcy of the paying agent. A mandatory sinking fund redemption may be a provision of a municipal security issue whereby part of the municipal security issue may be retired before maturity.

Because a significant portion of the municipal securities issued and outstanding is insured by a small number of insurance companies, an event involving one or more of these insurance companies could have a significant adverse effect on the value of the securities insured by that insurance company and on the municipal markets as a whole.

U.S. Government Securities. The Fund and certain Underlying Funds may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as Fannie Mae, the Government National Mortgage Association ("Ginnie Mae"), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (Farmer Mac).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such

as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

On September 7, 2008, the U.S. Treasury announced a federal takeover of Fannie Mae, and Freddie Mac, placing the two federal instrumentalities in conservatorship. Under the takeover, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the “Senior Preferred Stock Purchase Agreement” or “Agreement”). Under the Agreement, the U.S. Treasury pledged to provide up to \$200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the \$200 billion cap on the U.S. Treasury’s funding commitment to increase as necessary to accommodate any cumulative reduction in net worth over the next three years. As a result of this Agreement, the investments of holders, including the Fund, of mortgage-backed securities and other obligations issued by Fannie Mae and Freddie Mac are protected.

- *U.S. Treasury Obligations.* U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry system known as Separately Traded Registered Interest and Principal Securities (“STRIPS”) and Treasury Receipts (“TRs”).
- *Receipts.* Interests in separately traded interest and principal component parts of U.S. government obligations that are issued by banks or brokerage firms and are created by depositing U.S. government obligations into a special account at a custodian bank. The custodian holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. TRs and STRIPS are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities.
- *U.S. Government Zero Coupon Securities.* STRIPS and receipts are sold as zero coupon securities, that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturity and credit qualities.
- *U.S. Government Agencies.* Some obligations issued or guaranteed by agencies of the U.S. government are supported by the full faith and credit of the U.S. Treasury, others are supported by the right of the issuer to borrow from the U.S. Treasury, while still others are supported only by the credit of the instrumentality. Guarantees of principal by agencies or instrumentalities of the U.S. government may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on

the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of the Fund's Shares.

Ratings. An investment grade rating means the security or issuer is rated investment-grade by Standard & Poor's Ratings Group, a division of The McGraw-Hill Companies, Inc. ("S&P"), Moody's Investors Service, Inc. ("Moody's"), Fitch Ratings, Ltd. ("Fitch") or another nationally recognized statistical rating organization, or is unrated but considered to be of equivalent quality by an Underlying Fund's investment adviser, as applicable. Bonds rated Baa by Moody's or BBB by S&P or above are considered "investment grade" securities; bonds rated Baa are considered medium grade obligations which lack outstanding investment characteristics and have speculative characteristics; and bonds rated BBB are regarded as having adequate capacity to pay principal and interest.

When-Issued Securities. A when-issued security is one whose terms are available and for which a market exists, but which has not been issued. When a fund engages in when-issued transactions, it relies on the other party to consummate the sale. If the other party fails to complete the sale, the fund may miss the opportunity to obtain the security at a favorable price or yield.

When purchasing a security on a when-issued basis, a fund assumes the rights and risks of ownership of the security, including the risk of price and yield changes. At the time of settlement, the market value of the security may be more or less than the purchase price. The yield available in the market when the delivery takes place also may be higher than those obtained in the transaction itself. Because the fund does not pay for the security until the delivery date, these risks are in addition to the risks associated with its other investments.

Decisions to enter into "when-issued" transactions will be considered on a case-by-case basis when necessary to maintain continuity in a company's index membership. If the Fund enters into such transactions directly, it will segregate cash or liquid securities equal in value to commitments for the when-issued transactions. The Fund will segregate additional liquid assets daily so that the value of such assets is equal to the amount of the commitments.

FOREIGN SECURITIES

Foreign Issuers. Certain Underlying Funds may invest in issuers located outside the United States directly, or in financial instruments that are indirectly linked to the performance of foreign issuers. Examples of such financial instruments include depositary receipts, which are described further below, "ordinary shares," and "New York shares" issued and traded in the United States. Ordinary shares are shares of foreign issuers that are traded abroad and on a United States exchange. New York shares are shares that a foreign issuer has allocated for trading in the United States. American Depositary Receipts ("ADRs"), ordinary shares, and New York shares all may be purchased with and sold for U.S. Dollars, which protects the Underlying Fund from the foreign settlement risks described below.

Investing in foreign companies may involve risks not typically associated with investing in United States companies. The U.S. dollar value of securities of foreign issuers and of distributions in foreign currencies from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. Dollar. Foreign securities markets generally have less trading volume and less liquidity than United States markets, and prices in some foreign markets can be very volatile compared to those of domestic securities. Therefore, an Underlying Fund's investment in foreign securities may be less liquid and subject to more rapid and erratic price movements than comparable securities listed for trading on U.S. exchanges. Non-U.S. equity securities may trade at price/earnings multiples higher than comparable U.S. securities and such levels may not be sustainable. There may be less government supervision and regulation of foreign stock exchanges, brokers, banks and listed companies abroad than in the U.S. Moreover, settlement

practices for transactions in foreign markets may differ from those in U.S. markets. Such differences may include delays beyond periods customary in the U.S. and practices, such as delivery of securities prior to receipt of payment, which increase the likelihood of a failed settlement, which can result in losses to an Underlying Fund. The value of non-U.S. investments and the investment income derived from them may also be affected unfavorably by changes in currency exchange control regulations. Foreign brokerage commissions, custodial expenses and other fees are also generally higher than for securities traded in the U.S. This may cause the Underlying Fund to incur higher portfolio transaction costs than domestic equity funds. Fluctuations in exchange rates may also affect the earning power and asset value of the foreign entity issuing a security, even one denominated in U.S. dollars. Dividend and interest payments may be repatriated based on the exchange rate at the time of disbursement, and restrictions on capital flows may be imposed. Many foreign countries lack uniform accounting, auditing and financial reporting standards comparable to those that apply to United States companies, and it may be more difficult to obtain reliable information regarding a foreign issuer's financial condition and operations. In addition, the costs of foreign investing, including withholding taxes, brokerage commissions, and custodial fees, generally are higher than for United States investments.

Investing in companies located abroad carries political and economic risks distinct from those associated with investing in the United States. Foreign investment may be affected by actions of foreign governments adverse to the interests of United States investors, including the possibility of expropriation or nationalization of assets, confiscatory taxation, restrictions on United States investment, or on the ability to repatriate assets or to convert currency into U.S. Dollars. There may be a greater possibility of default by foreign governments or foreign-government sponsored enterprises. Losses and other expenses may be incurred in converting between various currencies in connection with purchases and sales of foreign securities. Investments in foreign countries also involve a risk of local political, economic, or social instability, military action or unrest, or adverse diplomatic developments.

Investing in companies domiciled in emerging market countries may be subject to greater risks than investments in developed countries. These risks include: (i) less social, political, and economic stability; (ii) greater illiquidity and price volatility due to smaller or limited local capital markets for such securities, or low or non-existent trading volumes; (iii) foreign exchanges and broker-dealers may be subject to less scrutiny and regulation by local authorities; (iv) local governments may decide to seize or confiscate securities held by foreign investors and/or local governments may decide to suspend or limit an issuer's ability to make dividend or interest payments; (v) local governments may limit or entirely restrict repatriation of invested capital, profits, and dividends; (vi) capital gains may be subject to local taxation, including on a retroactive basis; (vii) issuers facing restrictions on dollar or euro payments imposed by local governments may attempt to make dividend or interest payments to foreign investors in the local currency; (viii) investors may experience difficulty in enforcing legal claims related to the securities and/or local judges may favor the interests of the issuer over those of foreign investors; (ix) bankruptcy judgments may only be permitted to be paid in the local currency; (x) limited public information regarding the issuer may result in greater difficulty in determining market valuations of the securities, and (xi) lax financial reporting on a regular basis, substandard disclosure, and differences in accounting standards may make it difficult to ascertain the financial health of an issuer.

Depository Receipts. An Underlying Fund's investment in securities of foreign companies may be in the form of depository receipts or other securities convertible into securities of foreign issuers. ADRs are dollar-denominated receipts representing interests in the securities of a foreign issuer, which securities may not necessarily be denominated in the same currency as the securities into which they may be converted. ADRs are receipts typically issued by United States banks and trust companies which evidence ownership of underlying securities issued by a foreign corporation. Generally, ADRs in registered form are designed for use in domestic securities markets and are traded on exchanges or over-the-counter in the United States. American Depositary Shares (ADSs) are U.S. dollar-denominated equity shares of a foreign-based

company available for purchase on an American stock exchange. ADSs are issued by depository banks in the United States under an agreement with the foreign issuer, and the entire issuance is called an ADR and the individual shares are referred to as ADSs. Global Depository Receipts (“GDRs”), European Depository Receipts (“EDRs”), and International Depository Receipts (“IDRs”) are similar to ADRs in that they are certificates evidencing ownership of shares of a foreign issuer, however, GDRs, EDRs, and IDRs may be issued in bearer form and denominated in other currencies, and are generally designed for use in specific or multiple securities markets outside the U.S. EDRs, for example, are designed for use in European securities markets while GDRs are designed for use throughout the world. Depository receipts will not necessarily be denominated in the same currency as their underlying securities.

All Depository Receipts generally must be sponsored. However, an Underlying Fund may invest in unsponsored Depository Receipts under certain limited circumstances. The issuers of unsponsored Depository Receipts are not obligated to disclose material information in the United States, and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the Depository Receipts. The use of Depository Receipts may increase tracking error relative to an underlying Index.

REAL ESTATE INVESTMENT TRUSTS (“REITs”)

Certain Underlying Funds may invest in REITs. A REIT is a corporation or business trust (that would otherwise be taxed as a corporation) which meets the definitional requirements of the Internal Revenue Code. The Internal Revenue Code permits a qualifying REIT to deduct from taxable income the dividends paid, thereby effectively eliminating corporate level federal income tax and making the REIT a pass-through vehicle for federal income tax purposes. To meet the definitional requirements of the Internal Revenue Code, a REIT must, among other things: invest substantially all of its assets in interests in real estate (including mortgages and other REITs), cash and government securities; derive most of its income from rents from real property or interest on loans secured by mortgages on real property; and, in general, distribute annually 90% or more of its otherwise taxable income to shareholders.

REITs are sometimes informally characterized as Equity REITs and Mortgage REITs. An Equity REIT invests primarily in the fee ownership or leasehold ownership of land and buildings; a Mortgage REIT invests primarily in mortgages on real property, which may secure construction, development or long-term loans.

REITs may be affected by changes in underlying real estate values, which may have an exaggerated effect to the extent that REITs in which the Fund invests may concentrate investments in particular geographic regions or property types. Additionally, rising interest rates may cause investors in REITs to demand a higher annual yield from future distributions, which may in turn decrease market prices for equity securities issued by REITs. Rising interest rates also generally increase the costs of obtaining financing, which could cause the value of the Fund’s investments to decline. During periods of declining interest rates, certain Mortgage REITs may hold mortgages that the mortgagors elect to prepay, which prepayment may diminish the yield on securities issued by such Mortgage REITs. In addition, Mortgage REITs may be affected by the ability of borrowers to repay when due the debt extended by the REIT and Equity REITs may be affected by the ability of tenants to pay rent.

Certain REITs have relatively small market capitalization, which may tend to increase the volatility of the market price of securities issued by such REITs. Furthermore, REITs are dependent upon specialized management skills, have limited diversification and are, therefore, subject to risks inherent in operating and financing a limited number of projects. By investing in REITs indirectly through an Underlying Fund, a shareholder will bear not only his or her proportionate share of the expenses of the Underlying Fund, but also, indirectly, similar expenses of the REITs. REITs depend generally on their ability to generate cash

flow to make distributions to shareholders.

In addition to these risks, Equity REITs may be affected by changes in the value of the underlying property owned by the trusts, while Mortgage REITs may be affected by the quality of any credit extended. Further, Equity and Mortgage REITs are dependent upon management skills and generally may not be diversified. Equity and Mortgage REITs are also subject to heavy cash flow dependency defaults by borrowers and self-liquidation. In addition, Equity and Mortgage REITs could possibly fail to qualify for tax free pass-through of income under the Internal Revenue Code or to maintain their exemptions from registration under the 1940 Act. The above factors may also adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

REPURCHASE AGREEMENTS

The Fund may invest in repurchase agreements with commercial banks, brokers or dealers to generate income from its excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which the Fund acquires a financial instrument (*e.g.*, a security issued by the U.S. government or an agency thereof, a banker's acceptance or a certificate of deposit) from a seller, subject to resale to the seller at an agreed upon price and date (normally, the next Business Day). A repurchase agreement may be considered a loan collateralized by securities. The resale price reflects an agreed upon interest rate effective for the period the instrument is held by the Fund and is unrelated to the interest rate on the underlying instrument.

In these repurchase agreement transactions, the securities acquired by the Fund (including accrued interest earned thereon) must have a total value in excess of the value of the repurchase agreement and are held by the Custodian until repurchased. No more than an aggregate of 15% of the Fund's net assets will be invested in illiquid securities, including repurchase agreements having maturities longer than seven days and securities subject to legal or contractual restrictions on resale, or for which there are no readily available market quotations.

The use of repurchase agreements involves certain risks. For example, if the other party to the agreement defaults on its obligation to repurchase the underlying security at a time when the value of the security has declined, the Fund may incur a loss upon disposition of the security. If the other party to the agreement becomes insolvent and subject to liquidation or reorganization under the U.S. Bankruptcy Code or other laws, a court may determine that the underlying security is collateral for a loan by the Fund not within the control of the Fund and, therefore, the Fund may not be able to substantiate its interest in the underlying security and may be deemed an unsecured creditor of the other party to the agreement.

BORROWING

The Fund may borrow money to the extent permitted by the 1940 Act. Under the 1940 Act, the Fund may borrow up to one-third (1/3) of its total assets. The Fund may borrow money for investment purposes. Borrowing will tend to exaggerate the effect on the NAV of any increase or decrease in the market value of the Fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by earnings on the securities purchased. The Fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

LENDING PORTFOLIO SECURITIES

The Fund may lend portfolio securities to certain creditworthy borrowers. The borrowers provide collateral that is maintained in an amount at least equal to the current market value of the securities loaned. The Fund may terminate a loan at any time and obtain the return of the securities loaned. The Fund receives the value of any interest or cash or non-cash distributions paid on the loaned securities. Distributions received on loaned securities in lieu of dividend payments (*i.e.*, substitute payments) would not be considered qualified dividend income.

With respect to loans that are collateralized by cash, the borrower will be entitled to receive a fee based on the amount of cash collateral. The Fund is compensated by the difference between the amount earned on the reinvestment of cash collateral and the fee paid to the borrower. In the case of collateral other than cash, the Fund is compensated by a fee paid by the borrower equal to a percentage of the market value of the loaned securities. Any cash collateral may be reinvested in certain short-term instruments either directly on behalf of the lending Fund or through one or more joint accounts or money market funds, which may include those managed by the Sub-Adviser.

The Fund may pay a portion of the interest or fees earned from securities lending to a borrower as described above, and to one or more securities lending agents approved by the Board who administer the lending program for the Fund in accordance with guidelines approved by the Board. In such capacity, the lending agent causes the delivery of loaned securities from the Fund to borrowers, arranges for the return of loaned securities to the Fund at the termination of a loan, requests deposit of collateral, monitors the daily value of the loaned securities and collateral, requests that borrowers add to the collateral when required by the loan agreements, and provides recordkeeping and accounting services necessary for the operation of the program.

Securities lending involves exposure to certain risks, including operational risk (*i.e.*, the risk of losses resulting from problems in the settlement and accounting process), “gap” risk (*i.e.*, the risk of a mismatch between the return on cash collateral reinvestments and the fees the Fund has agreed to pay a borrower), and credit, legal, counterparty and market risk. In the event a borrower does not return the Fund’s securities as agreed, the Fund may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated plus the transaction costs incurred in purchasing replacement securities.

REVERSE REPURCHASE AGREEMENTS

The Fund may enter into reverse repurchase agreements, which involve the sale of securities with an agreement to repurchase the securities at an agreed-upon price, date and interest payment and have the characteristics of borrowing. The securities purchased with the funds obtained from the agreement and securities collateralizing the agreement will have maturity dates no later than the repayment date. Generally the effect of such transactions is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while in many cases the Fund is able to keep some of the interest income associated with those securities. Such transactions are only advantageous if the Fund has an opportunity to earn a greater rate of interest on the cash derived from these transactions than the interest cost of obtaining the same amount of cash. Opportunities to realize earnings from the use of the proceeds equal to or greater than the interest required to be paid may not always be available and the Fund intends to use the reverse repurchase technique only when the Sub-Adviser believes it will be advantageous to the Fund. The use of reverse repurchase agreements may exaggerate any interim increase or decrease in the value of the Fund’s assets. The Fund’s exposure to reverse repurchase agreements will be covered by securities having a value equal to or greater than such commitments. Under the 1940 Act, reverse repurchase agreements are considered borrowings. Although

there is no limit on the percentage of total assets the Fund may invest in reverse repurchase agreements, the use of reverse repurchase agreements is not a principal strategy of the Fund.

OTHER SHORT-TERM INSTRUMENTS

In addition to repurchase agreements, the Fund may invest in short-term instruments, including money market instruments, on an ongoing basis to provide liquidity or for other reasons. Money market instruments are generally short-term investments that may include but are not limited to: (i) shares of money market funds; (ii) obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities (including government-sponsored enterprises); (iii) negotiable certificates of deposit (“CDs”), bankers’ acceptances, fixed time deposits and other obligations of U.S. and foreign banks (including foreign branches) and similar institutions; (iv) commercial paper rated at the date of purchase “Prime-1” by Moody’s or “A-1” by S&P, or if unrated, of comparable quality as determined by the Sub-Adviser; (v) non-convertible corporate debt securities (*e.g.*, bonds and debentures) with remaining maturities at the date of purchase of not more than 397 days and that satisfy the rating requirements set forth in Rule 2a-7 under the 1940 Act; and (vi) short-term U.S. dollar-denominated obligations of foreign banks (including U.S. branches) that, in the opinion of the Sub-Adviser, are of comparable quality to obligations of U.S. banks which may be purchased by the Fund. Any of these instruments may be purchased on a current or a forward-settled basis. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers’ acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

INVESTMENT COMPANIES

The Fund will invest in the securities of other investment companies, subject to applicable limitations under Section 12(d)(1) of the 1940 Act. Pursuant to Section 12(d)(1)(A), the Fund may invest in the securities of another investment company (the “acquired company”) provided that the Fund, immediately after such purchase or acquisition, does not own in the aggregate: (i) more than 3% of the total outstanding voting stock of the acquired company; (ii) securities issued by the acquired company having an aggregate value in excess of 5% of the value of the total assets of the Fund; or (iii) securities issued by the acquired company and all other investment companies (other than Treasury stock of the Fund) having an aggregate value in excess of 10% of the value of the total assets of the Fund. In addition, the Fund is subject to Section 12(d)(1)(C), which provides that the Fund may not acquire shares of a closed-end fund if, immediately after such acquisition, the Fund and other investment companies having the same adviser as the Fund would hold more than 10% of the closed-end fund’s total outstanding voting stock. However, Section 12(d)(1)(F) of the 1940 Act provides that the limitations of paragraph 12(d)(1) shall not apply to securities purchased or otherwise acquired by the Fund if immediately after such purchase or acquisition not more than 3% of the total outstanding shares of such investment company is owned by the Fund and all affiliated persons of the Fund. If the Fund invests in investment companies pursuant to Section 12(d)(1)(F), it must comply with the following voting restrictions: when the Fund exercises voting rights, by proxy or otherwise, with respect to investment companies owned by the Fund, the Fund will either seek instruction from the Fund’s shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or vote the shares held by the Fund in the same proportion as the vote of all other holders of the securities of the investment company. In addition, an investment company purchased by the Fund pursuant to Section 12(d)(1)(F) shall not be required to redeem more than 1% of such investment company’s total outstanding shares (including those owned by the Fund) in any period of less than thirty days.

The acquisition of the Fund’s Shares by registered investment companies is subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by exemptive rules under the 1940 Act or as may at some future time be permitted by an exemptive order that permits registered investment companies

to invest in the Fund beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including that the registered investment company enter into an agreement with the Fund regarding the terms of the investment. The Fund currently intends to rely on Section 12(d)(1)(F) of the 1940 Act in making its investments; however, the Fund may rely on different exemptions in the future, or to the extent available.

When the Fund invests in and, thus, is a shareholder of, another investment company, the Fund's shareholders will indirectly bear the Fund's proportionate share of the fees and expenses paid by such other investment company, including advisory fees, in addition to both the management fees payable directly by the Fund to the Fund's own investment adviser and the other expenses that the Fund bears directly in connection with the Fund's own operations.

FUTURES CONTRACTS, OPTIONS AND SWAP AGREEMENTS

The Fund, directly or through the Underlying Funds, may utilize futures contracts, options contracts and swap agreements. Futures contracts generally provide for the future sale by one party and purchase by another party of a specified commodity or security at a specified future time and at a specified price. Index futures contracts are settled daily with a payment by one party to the other of a cash amount based on the difference between the level of the index specified in the contract from one day to the next. Futures contracts are standardized as to maturity date and underlying instrument and are traded on futures exchanges.

The Fund is required to make a good faith margin deposit in cash or U.S. government securities with a broker or custodian to initiate and maintain open positions in futures contracts. A margin deposit is intended to assure completion of the contract (delivery or acceptance of the underlying commodity or payment of the cash settlement amount) if it is not terminated prior to the specified delivery date. Brokers may establish deposit requirements which are higher than the exchange minimums. Futures contracts are customarily purchased and sold on margin deposits which may range upward from less than 5% of the value of the contract being traded.

After a futures contract position is opened, the value of the contract is marked to market daily. If the futures contract price changes to the extent that the margin on deposit does not satisfy margin requirements, payment of additional "variation" margin will be required. Conversely, change in the contract value may reduce the required margin, resulting in a repayment of excess margin to the contract holder. Variation margin payments are made to and from the futures broker for as long as the contract remains open. In such case, the Fund would expect to earn interest income on its margin deposits. Closing out an open futures position is done by taking an opposite position ("buying" a contract which has previously been "sold" or "selling" a contract previously "purchased") in an identical contract to terminate the position. Brokerage commissions are incurred when a futures contract position is opened or closed.

The Fund may purchase and sell put and call options. A call option gives a holder the right to purchase a specific security or an index at a specified price ("exercise price") within a specified period of time. A put option gives a holder the right to sell a specific security or an index at a specified price within a specified period of time. The initial purchaser of a call option pays the "writer," *i.e.*, the party selling the option, a premium which is paid at the time of purchase and is retained by the writer whether or not such option is exercised. The Fund may purchase put options to hedge their portfolios against the risk of a decline in the market value of securities held and may purchase call options to hedge against an increase in the price of securities it is committed to purchase. The Fund may write put and call options along with a long position in options to increase their ability to hedge against a change in the market value of the securities they hold or are committed to purchase.

Options may relate to particular securities and may or may not be listed on a national securities exchange and issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options on particular securities may be more volatile than the underlying securities, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying securities themselves.

Restrictions on the Use of Futures and Options. In February 2012, the Commodity Futures Trading Commission (“CFTC”) adopted amendments to Rule 4.5 of the Commodity Exchange Act (“CEA”) that significantly limit the ability of certain regulated entities, including registered investment companies such as the Fund, to rely on an exclusion that would exempt its investment adviser from having to register with the CFTC as a commodity pool operator (“CPO”). The exclusion from Rule 4.5 previously allowed registered investment companies to engage in unlimited transactions involving futures contracts. However, under amended Rule 4.5, the investment adviser of a registered investment company may claim exclusion from registration as a CPO only if the registered investment company that it advises uses futures contracts solely for “bona fide hedging purposes” or limits its use of futures contracts for non-bona fide hedging purposes such that (i) the aggregate initial margin and premiums required to establish non-bona fide hedging positions with respect to futures contracts do not exceed 5% of the liquidation value of the registered investment company's portfolio, or (ii) the aggregate "notional value" of the non-bona fide hedging commodity interests do not exceed 100% of the liquidation value of the registered investment company's portfolio (taking into account unrealized profits and unrealized losses on any such positions). The Adviser has claimed exclusion on behalf of the Fund under the amended Rule 4.5. These rule revisions effectively limit the Fund's use, and its investment in Underlying Funds that make use, of futures, options on futures, swaps, or other commodity interests. The Fund currently intends to comply with the terms of revised Rule 4.5 so as to avoid regulation as a commodity pool, and as a result, the ability of the Fund to utilize, or invest in Underlying Funds that utilize, futures, options on futures, swaps, or other commodity interests may be limited in accordance with the terms of the rule.

Swap Agreements. The Fund may enter into swap agreements; including interest rate, index, and total return swap agreements. Swap agreements are contracts between parties in which one party agrees to make periodic payments to the other party based on the change in market value or level of a specified rate, index or asset. In return, the other party agrees to make payments to the first party based on the return of a different specified rate, index or asset. Swap agreements will usually be done on a net basis, *i.e.*, where the two parties make net payments with the Fund receiving or paying, as the case may be, only the net amount of the two payments. The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each swap is accrued on a daily basis and an amount of cash or equivalents having an aggregate value at least equal to the accrued excess is maintained by the Fund.

In a total return swap transaction, one party agrees to pay the other party an amount equal to the total return on a defined underlying asset or a non-asset reference during a specified period of time. The underlying asset might be a security or basket of securities, and the non-asset reference could be a securities index. In return, the other party would make periodic payments based on a fixed or variable interest rate or on the total return from a different underlying asset or non-asset reference. The payments of the two parties could be made on a net basis.

Options on Swaps. An option on a swap agreement, or a “swaption,” is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. In return, the purchaser pays a “premium” to the seller of the contract. The seller of the contract receives the premium and bears the risk of unfavorable changes on the underlying swap. The Fund may write (sell) and purchase put and call swaptions. The Fund may also enter into swaptions on either an asset-based or liability-based basis, depending on whether the Fund is hedging its assets or its liabilities. The Fund may

write (sell) and purchase put and call swaptions to the same extent it may make use of standard options on securities or other instruments. The Fund may enter into these transactions primarily to preserve a return or spread on a particular investment or portion of its holdings, as a duration management technique, to protect against an increase in the price of securities the Fund anticipates purchasing at a later date, or for any other purposes, such as for speculation to increase returns. Swaptions are generally subject to the same risks involved in the Fund's use of options.

The SEC recently proposed a new rule related to the use of derivatives and financial commitment transactions (including short sales, described below) by registered investment companies, such as the Fund. Whether and when this proposed rule will be adopted and its potential effects on the Fund are unclear, although they could be substantial and adverse to the Fund. The regulation of these types of transactions in the United States is a rapidly changing area of law and is subject to ongoing modification by government, self-regulatory and judicial action.

SHORT SALES

The Fund, directly or through the Underlying Funds, may engage in short sales that are either "uncovered" or "against the box." A short sale is "against the box" if at all times during which the short position is open, the Fund owns at least an equal amount of the securities or securities convertible into, or exchangeable without further consideration for, securities of the same issue as the securities that are sold short. A short sale against the box is a taxable transaction to the Fund with respect to the securities that are sold short.

Uncovered short sales are transactions under which the Fund sells a security it does not own. To complete such a transaction, the Fund must borrow the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of the replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay the lender amounts equal to any dividends or interest that accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet margin requirements, until the short position is closed out.

Until the Fund closes its short position or replaces the borrowed security, the Fund may: (a) segregate cash or liquid securities at such a level that the amount segregated plus the amount deposited with the broker as collateral will equal the current value of the security sold short; or (b) otherwise cover the Fund's short position.

FUTURE DEVELOPMENTS

The Fund may take advantage of opportunities in the area of options and futures contracts, options on futures contracts, warrants, swaps and any other investments which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure.

SPECIAL CONSIDERATIONS AND RISKS

A discussion of the risks associated with an investment in the Fund is contained in the Prospectus. The discussion below supplements, and should be read in conjunction with, the Prospectus.

GENERAL

Investment in the Fund should be made with an understanding that the value of the Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of the issuers of the portfolio securities, the value of securities generally and other factors.

An investment in the Fund should also be made with an understanding of the risks inherent in an investment in securities, including the risk that the financial condition of issuers may become impaired or that the general condition of the securities markets may deteriorate (either of which may cause a decrease in the value of the portfolio securities and thus in the value of Shares). Securities are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic and banking crises.

Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, have generally inferior rights to receive payments from the issuer in comparison with the rights of creditors of, or holders of debt obligations or preferred stocks issued by, the issuer. Further, unlike debt securities which typically have a stated principal amount payable at maturity (whose value, however, will be subject to market fluctuations prior thereto), or preferred stocks which typically have a liquidation preference and which may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. Common stock values are subject to market fluctuations as long as the common stock remains outstanding.

FUTURES AND OPTIONS TRANSACTIONS

Positions in futures contracts and options may be closed out only on an exchange which provides a secondary market therefore. However, there can be no assurance that a liquid secondary market will exist for any particular futures contract or option at any specific time. Thus, it may not be possible to close a futures or options position. In the event of adverse price movements, an Underlying Fund would continue to be required to make daily cash payments to maintain its required margin. In such situations, if the Underlying Fund has insufficient cash, it may have to sell portfolio securities to meet daily margin requirements at a time when it may be disadvantageous to do so. In addition, the Underlying Fund may be required to make delivery of the instruments underlying futures contracts it has sold.

The Underlying Fund will minimize the risk that it will be unable to close out a futures or options contract by only entering into futures and options for which there appears to be a liquid secondary market.

The risk of loss in trading futures contracts or uncovered call options in some strategies (*e.g.*, selling uncovered index futures contracts) is potentially unlimited. The risk of a futures position may still be large as traditionally measured due to the low margin deposits required. In many cases, a relatively small price movement in a futures contract may result in immediate and substantial loss or gain to the investor relative to the size of a required margin deposit.

Utilization of futures transactions by an Underlying Fund involves the risk of imperfect or even negative correlation to the Index if the index underlying the futures contracts differs from the Index. There is also the risk of loss by the Underlying Fund of margin deposits in the event of bankruptcy of a broker with whom the Underlying Fund has an open position in the futures contract or option.

Certain financial futures exchanges limit the amount of fluctuation permitted in futures contract prices during a single trading day. The daily limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day's settlement price at the end of a trading session. Once the daily limit has been reached in a particular type of contract, no trades may be made on that day at a price beyond that limit. The daily limit governs only price movement during a particular trading day and therefore does not limit potential losses, because the limit may prevent the liquidation of unfavorable positions. Futures contract prices have occasionally moved to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and subjecting some futures traders to substantial losses.

RISKS OF SWAP AGREEMENTS

The risk of loss with respect to swaps generally is limited to the net amount of payments that an Underlying Fund is contractually obligated to make. Swap agreements are subject to the risk that the swap counterparty will default on its obligations. If such a default occurs, an Underlying Fund will have contractual remedies pursuant to the agreements related to the transaction, but such remedies may be subject to bankruptcy and insolvency laws which could affect the Underlying Fund's rights as a creditor (*e.g.*, the Underlying Fund may not receive the net amount of payments that it contractually is entitled to receive).

The use of interest-rate and index swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. These transactions generally do not involve the delivery of securities or other underlying assets or principal.

Total return swaps could result in losses if the underlying asset or reference does not perform as anticipated. Total return swaps can have the potential for unlimited losses. The Underlying Fund may lose money in a total return swap if the counterparty fails to meet its obligations.

RECENT MARKET CIRCUMSTANCES

The financial crisis in the U.S. and global economies over the past several years, including the European sovereign debt crisis, has resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Liquidity in some markets has decreased and credit has become scarcer worldwide. Recent regulatory changes, including the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") and the introduction of new international capital and liquidity requirements set forth by the Basel Committee on Banking Supervision (known as "Basel III"), may cause lending activity within the financial services sector to be constrained for several years as Basel III rules phase in and rules and regulations are promulgated and interpreted under the Dodd-Frank Act.

Since 2010, the risks of investing in certain foreign government debt have increased dramatically as a result of the ongoing European debt crisis, which began in Greece and has spread to varying degrees throughout various other European countries. These debt crises and the ongoing efforts of governments around the world to address these debt crises have also resulted in increased volatility and uncertainty in the global securities markets and it is impossible to predict the effects of these or similar events in the future on the Fund, though it is possible that these or similar events could have a significant adverse impact on the value and risk profile of the Fund.

In the United States, on August 5, 2011, S&P lowered its long-term sovereign credit rating on the U.S. federal government debt to "AA+" from "AAA." Any additional downgrade by S&P, or any other rating agency, could increase volatility in both stock and bond markets, result in higher interest rates and higher Treasury yields and increase the costs of all kinds of debt.

Global economies and financial markets are also becoming increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. For example, in a referendum held on June 23, 2016, citizens of the United Kingdom voted to leave the European Union (“EU”), creating economic and political uncertainty in its wake. The country’s departure from the EU (known as “Brexit”) sparked depreciation in the value of the British pound, short-term declines in the stock markets and heightened risk of continued economic volatility worldwide.

As a consequence of the United Kingdom’s vote to withdraw from the EU, the government of the United Kingdom may, pursuant to the Treaty of Lisbon (the “Treaty”), give notice of its withdrawal and enter into negotiations with the EU Council to agree to terms for the United Kingdom’s withdrawal from the EU. The Treaty provides for a two-year negotiation period, which may be shortened or extended by agreement of the parties. However, there is still considerable uncertainty relating to the potential consequences and precise timeframe for the exit, how the negotiations for the withdrawal and new trade agreements will be conducted, and whether the United Kingdom’s exit will increase the likelihood of other countries also departing the EU. During this period of uncertainty, the negative impact on not only the United Kingdom and European economies, but the broader global economy, could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues. Any further exits from the EU, or the possibility of such exits, would likely cause additional market disruption globally and introduce new legal and regulatory uncertainties.

The impact of these types of developments in the near- and long-term is unknown and could have additional adverse effects on economies, financial markets and asset valuations around the world.

CYBER SECURITY RISK

Investment companies, such as the Fund, and their service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber attacks affecting the Fund or the Adviser, Sub-Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Fund. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact the Fund’s ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject the Fund to regulatory fines or financial losses, and cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers, and may cause the Fund’s investment in such portfolio companies to lose value.

INVESTMENT RESTRICTIONS

Fundamental Policies of the Fund

The investment limitations listed below are fundamental policies of the Fund and cannot be changed without the vote of a majority of the outstanding voting securities of the Fund. Under the 1940 Act, a “vote of a majority of the outstanding voting securities” of a fund means the affirmative vote of the lesser of (1) more than 50% of the outstanding shares of the fund or (2) 67% or more of the shares present at a shareholders meeting if more than 50% of the outstanding shares are represented at the meeting in person or by proxy.

The Fund may not:

1. Borrow money, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
2. Purchase or sell commodities or commodity contracts unless acquired as a result of ownership of securities or other instruments issued by persons that purchase or sell commodities or commodities contracts; but this shall not prevent the Fund from purchasing, selling and entering into financial futures contracts (including futures contracts on indices of securities, interest rates and currencies), options on financial futures contracts (including futures contracts on indices of securities, interest rates and currencies), warrants, swaps, forward contracts, foreign currency spot and forward contracts or other derivative instruments that are not related to physical commodities.
3. Invest 25% or more of its total assets in the securities of one or more issuers conducting their principal business activities in the same industry or group of industries. This limitation does not apply to investments in securities issued or guaranteed by the U.S. government or its agencies or instrumentalities.
4. Make loans, except as permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
5. Purchase or sell real estate, except that, to the extent permitted by applicable law, the Fund may (a) invest in securities or other instruments directly or indirectly secured by real estate, and (b) invest in securities or other instruments issued by issuers that invest in real estate.
6. Issue senior securities, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
7. Underwrite securities issued by others, except to the extent that the Fund may be considered an underwriter within the meaning of the Securities Act in the disposition of restricted securities or in connection with investments in other investment companies.

Non-Fundamental Policies

In addition to the Fund's investment objective, the investment limitations listed below are non-fundamental policies of the Fund and may be changed with respect to the Fund by the Board without the consent of the holders of a majority of the Fund's outstanding shares.

1. The Fund may not purchase or hold illiquid securities if, in the aggregate, more than 15% of its net assets would be invested in illiquid securities.
2. The Fund will not, under normal circumstances, invest less than 80% of its net assets, plus the amount of any borrowings for investment purposes, in securities issued by Underlying Funds.

With regard to the policies described above, if a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money and illiquid securities will be observed continuously. If the percentage of the Fund's net assets invested in illiquid securities exceeds 15% due to market activity or

changes in the Fund's portfolio, the Fund will take appropriate measures to reduce its holdings of illiquid securities.

The following descriptions of certain provisions of the 1940 Act may assist investors in understanding the above policies and restrictions:

Concentration. The SEC has defined concentration as investing 25% or more of an investment company's total assets in an industry or group of industries, with certain exceptions.

Borrowing. The 1940 Act presently allows a fund to: (1) borrow from any bank (including pledging, mortgaging or hypothecating assets) in an amount up to 33 1/3% of its total assets, (2) borrow money for temporary purposes in an amount not exceeding 5% of the value of the fund's total assets at the time of the loan, and (3) enter into reverse repurchase agreements.

Senior Securities. Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

Lending. Under the 1940 Act, a fund may only make loans if expressly permitted by its investment policies. The Fund's current investment policy on lending is as follows: the Fund may not make loans except as permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.

Underwriting. Under the 1940 Act, underwriting securities involves a fund purchasing securities directly from an issuer for the purpose of selling (distributing) them or participating in any such activity either directly or indirectly.

Real Estate. The 1940 Act does not directly restrict an investment company's ability to invest in real estate, but does require that every investment company have a fundamental investment policy governing such investments. The Fund will not purchase or sell real estate, except that, to the extent permitted by applicable law, the Fund may (a) invest in securities or other instruments directly or indirectly secured by real estate, and (b) invest in securities or other instruments issued by issuers that invest in real estate.

Commodities. The 1940 Act does not directly restrict an investment company's ability to invest in commodities, but does require that every investment company have a fundamental investment policy governing such investments. Consistent with applicable law, the Fund may purchase or sell options, futures, forward contracts, or swaps, may invest in securities or other instruments backed by commodities, including physical commodities, and may invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities.

PORTFOLIO TURNOVER

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses. The overall reasonableness of brokerage commissions is evaluated by the Sub-Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust's Board has adopted a policy regarding the disclosure of information about the Fund's security holdings. The policy is designed to prevent the possible misuse of knowledge of the Fund's portfolio holdings and to ensure that the interests of the Adviser and Sub-Adviser, the Distributor, Custodian, Transfer Agent, Fund Accountant and Administrators, or any affiliated person of the Fund or the Fund's service providers, are not placed above those of the Fund's shareholders. The policy applies to all officers and agents of the Fund, including employees of the Adviser and Sub-Adviser.

The Fund's entire portfolio holdings are publicly disseminated each day the Fund is open for business through financial reporting and news services including publicly available internet web sites. In addition, the composition of the In-Kind Creation Basket and the In-Kind Redemption Basket, is publicly disseminated daily prior to the opening of the Exchange via the NSCC.

Greater than daily access to information concerning the Fund's portfolio holdings will be permitted (i) to certain personnel of service providers to the Fund involved in portfolio management and providing administrative, operational, risk management, or other support to portfolio management, and (ii) to other personnel of the Fund's service providers who deal directly with, or assist in, functions related to investment management, administration, custody and fund accounting, as may be necessary to conduct business in the ordinary course in a manner consistent with the Trust's exemptive relief, agreements with the Fund, and the terms of the Trust's current registration statement. From time to time, and in the ordinary course of business, such information may also be disclosed (i) to other entities that provide services to the Fund, including pricing information vendors, and third parties that deliver analytical, statistical or consulting services to the Fund and (ii) generally after it has been disseminated to the NSCC.

The Fund will disclose its complete portfolio holdings in public filings with the SEC on a quarterly basis, based on the Fund's fiscal year-end, within 60 days of the end of the quarter, and will provide that information to shareholders, as required by federal securities laws and regulations thereunder.

No person is authorized to disclose any of the Fund's portfolio holdings or other investment positions (whether in writing, by fax, by e-mail, orally, or by other means) except in accordance with this policy. The Trust's Chief Compliance Officer may authorize disclosure of portfolio holdings. The Board reviews the implementation of this policy on a periodic basis.

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the Fund's Prospectus. The discussion below supplements, and should be read in conjunction with, the Fund's Prospectus.

Shares of the Fund are approved for listing on the Exchange. The shares of the Fund will trade on the Exchange at prices that may differ to some degree from the Fund's NAV. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of shares will continue to be met.

The Exchange may, but is not required to, remove the shares of the Fund from listing if: (1) following the initial twelve-month period after commencement of trading on the Exchange of the Fund's shares, there are fewer than 50 beneficial holders of the shares for 30 or more consecutive trading days; (2) the IIV, as such term is defined below, is no longer calculated or available, or the portfolio of securities on which the Fund's NAV is calculated is not made available to all market participants at the same time; (3) the Fund has failed to file any filings required by the SEC or if the Exchange is aware that the Fund is not in

compliance with the conditions of any exemptive order or no-action relief granted by the SEC with respect to the Fund's shares; or (4) such other event occurs or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. In addition, the Exchange will remove the shares of the Fund from listing and trading upon termination of the Trust or the Fund. If there is an interruption in the availability of the Fund's "intraday indicative value" ("IIV"), the Exchange may halt trading in shares of the Fund during the day in which the interruption occurs. If such interruption persists beyond the trading day in which it first occurred, the Exchange will halt trading in shares of the Fund no later than the beginning of the next trading day unless or until such time as the values begin to be disseminated at the required frequency. If the Exchange becomes aware that the NAV or the portfolio of securities on which the Fund's NAV is calculated is not disseminated to all market participants at the same time, it will halt trading of the Fund's shares until such time as the NAV or portfolio is available to all market participants.

The Exchange (or market data vendors or other information providers) will disseminate, every fifteen seconds during the Exchange's regular trading hours, an IIV relating to the Fund. The IIV calculations are estimates of the value of the Fund's NAV and are based on the current market value of the securities and/or cash required to be deposited in exchange for a Creation Unit. Premiums and discounts between the IIV and the market price may occur. The IIV does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, it should not be viewed as a "real-time" update of the NAV of the Fund, which is calculated only once a day. The quotations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. Neither the Fund, the Adviser, nor any of their affiliates are involved in, or responsible for, the calculation or dissemination of such IIVs and make no warranty as to their accuracy.

As in the case of other stocks traded on the Exchange, broker's commissions on purchases or sales of shares in market transactions will be based on negotiated commission rates at customary levels.

The Trust reserves the right to adjust the price levels of shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

MANAGEMENT OF THE TRUST

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Fund Management."

TRUSTEES AND OFFICERS OF THE TRUST

Board Responsibilities. The management and affairs of the Trust and its series, including the Fund described in this SAI, are overseen by the Trust's Board. The Board elects the officers of the Trust who are responsible for administering the day-to-day operations of the Trust and the Fund. The Board has approved contracts, as described below, under which certain companies provide essential services to the Trust.

Like most mutual funds, the day-to-day business of the Trust, including the management of risk, is performed by third party service providers, such as the Adviser, Sub-Adviser, Distributor and Administrator. The Trustees are responsible for overseeing the Trust's service providers and, thus, have oversight responsibility with respect to risk management performed by those service providers. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Fund. The Fund and its service providers employ a variety of processes, procedures and controls to identify many of those possible events or circumstances, to lessen the probability of their occurrence

and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust's business (e.g., the Sub-Adviser is responsible for the day-to-day management of the Fund's portfolio investments) and, consequently, for managing the risks associated with that business. The Board has emphasized to the Fund's service providers the importance of maintaining vigorous risk management.

The Trustees' role in risk oversight begins before the inception of the Fund, at which time certain of the Fund's service providers present the Board with information concerning the investment objectives, strategies and risks of the Fund as well as proposed investment limitations for the Fund. Additionally, the Fund's Adviser provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board continues its oversight function as various personnel, including the Trust's Chief Compliance Officer, as well as personnel of the Sub-Adviser and other service providers such as the Fund's independent accountants, make periodic reports to the Audit Committee or to the Board with respect to various aspects of risk management. The Board and the Audit Committee oversee efforts by management and service providers to manage risks to which the Fund may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Fund by the Adviser and Sub-Adviser and receives information about those services at its regular meetings. In addition, on an annual basis, in connection with its consideration of whether to renew the Advisory Agreements with the Adviser and Sub-Adviser, the Board meets with the Adviser and Sub-Adviser to review such services. Among other things, the Board regularly considers the Adviser's and Sub-Adviser's adherence to the Fund's investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about the Fund's performance and the Fund's investments, including, for example, portfolio holdings schedules.

The Trust's Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and Fund and Adviser risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Adviser and the Sub-Adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the Fund's service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. The Board has also established a Valuation Committee that is responsible for implementing the Trust's Pricing Procedures and providing reports to the Board concerning investments for which market quotations are not readily available. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of the Fund's financial statements, focusing on major areas of risk encountered by the Fund and noting any significant deficiencies or material weaknesses in the Fund's internal controls. Additionally, in connection with its oversight function, the Board oversees Fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the Adviser, the Sub-Adviser, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the

Board and the Audit Committee learn in detail about the material risks of the Fund, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the Fund can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. Most of the Fund's investment management and business affairs are carried out by or through the Fund's Adviser and other service providers each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the Fund's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

Members of the Board. There are four members of the Board, three of whom are not interested persons of the Trust, as that term is defined in the 1940 Act ("independent Trustees"). Richard Hogan, the sole interested Trustee, serves as Chairman of the Board. The Trust does not have a lead independent trustee. The Board is comprised of a super-majority (67 percent or more) of independent Trustees. The Trust has determined its leadership structure is appropriate given the specific characteristics and circumstances of the Trust. The Trust made this determination in consideration of, among other things, the fact that the independent Trustees of the Fund constitute a super-majority of the Board, the number of independent Trustees that constitute the Board, the amount of assets under management in the Trust, and the number of Funds overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the independent Trustees from Fund management.

The Board has two standing committees: the Audit Committee and Governance and Nominating Committee. The Audit Committee and Governance and Nominating Committee are chaired by an independent Trustee and composed of independent Trustees.

Set forth below are the names, years of birth, positions with the Trust, lengths of term of office, and the principal occupations and other directorships held during at least the last five years of each of the persons currently serving as a Trustee of the Trust. The address of each Trustee of the Trust is c/o Exchange Listed Funds Trust, 10900 Hefner Pointe Drive, Suite 207, Oklahoma City, Oklahoma 73120.

Name and Year of Birth	Position(s) Held with the Trust	Term of Office and Length of Time Served ¹	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen By Trustee	Other Directorships held by Trustee
Interested Trustee					
Richard Hogan (1963)	Trustee and Secretary	Since 2012	Director, Exchange Traded Concepts, LLC 2011-present; Private Investor 2002-present; Secretary, Exchange Traded Concepts Trust 2011-present; Managing Member, Yorkville ETF Advisors 2011-2016	4	Board Member of Peconic Land Trust of Suffolk County, NY
Independent Trustees					
Timothy J. Jacoby (1952)	Trustee	Since 2014	Senior Partner, Deloitte & Touche LLP, Private Equity/Hedge Fund/Mutual Fund Services Practice — 2000-2014	13	Exchange Traded Concepts Trust (9) — Trustee; Edward Jones Money Market Fund— Trustee; Source ETF Trust— Trustee (2014-2015)
David M. Mahle (1944)	Trustee	Since 2012	Consultant, Jones Day 2012- present; Of Counsel, Jones Day 2008-2011; Partner, Jones Day 1988-2008	13	Exchange Traded Concepts Trust (9) — Trustee; Source ETF Trust— Trustee (2014-2015)
Kurt Wolfgruber (1950)	Trustee	Since 2012	Amherst Asset Management, 2010 to present — Independent Advisor; President, OppenheimerFunds, Inc. 2007-2009	13	Director, New Mountain Finance Corp.; Exchange Traded Concepts Trust (9) — Trustee ; Source ETF Trust— Trustee (2014-2015)

¹ Each Trustee shall serve during the continued life of the Trust until he or she dies, resigns, is declared bankrupt or incompetent by a court of competent jurisdiction, or is removed.

Individual Trustee Qualifications. The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Fund provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding material factors bearing on the management and administration of the Fund, and to exercise their business judgment in a manner that serves the best interests of the Fund's shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Hogan should serve as a Trustee because of his 26+ years of experience in senior level ETF management which began at Spear, Leeds & Kellogg ("SLK") in 1987, becoming a Limited Partner in 1990 and a Managing Director in 1992. As Managing Director of the Index Derivatives Group, he established trading operations in Chicago, Singapore and London as well as other satellite operations and nurtured Exchange Traded Funds ("ETFs") as a Specialist in SPDRs, WEBS, Sector SPDRs, iShares and other ETFs. Mr. Hogan became a Managing Director of Goldman Sachs when SLK was merged and played a critical role in combining the ETF operations of SLK, Goldman and Hull Trading (a prior Goldman acquisition). He has worked closely with Exchange staff, issuers, index providers and others in conceiving, designing, developing, launching, marketing and trading new ETFs, and championed the idea of a fixed income ETF. Mr. Hogan is a Founder and Director of Exchange Traded Concepts.

The Trust has concluded that Mr. Jacoby should serve as a Trustee because of the experience he has gained from over 25 years in or serving the investment management industry. Until his retirement in June 2014, Mr. Jacoby served as a partner at the audit and professional services firm Deloitte & Touche LLP, where he had worked since 2000, providing various services to asset management firms that manage mutual funds, hedge funds and private equity funds. Prior to that, Mr. Jacoby held various senior positions at financial services firms. Additionally, he served as a partner at Ernst & Young LLP. Mr. Jacoby is a Certified Public Accountant.

The Trust has concluded that Mr. Mahle should serve as Trustee because of the experience he has gained as an attorney in the investment management industry of a major law firm, representing exchange-traded funds and other investment companies as well as their sponsors and advisers and his knowledge and experience in investment management law and the financial services industry. Mr. Mahle is also a professor of law at Fordham Law School, where he lectures on investment companies and investment adviser regulations.

The Trust has concluded that Mr. Wolfgruber should serve as a Trustee because of his experience as President and Chief Investment Officer of OppenheimerFunds, Inc. where he was employed from 2000 to 2009. Mr. Wolfgruber was responsible for the oversight of sales, marketing, trading, risk management and the investment process of ten investment teams which, together, managed over \$200 billion across domestic and international asset classes. Mr. Wolfgruber has been involved in investment management for over 35 years with previous experience as a research analyst, portfolio manager and team and business leader at JP Morgan Investment Management from 1974 to 2000. He is a Chartered Financial Analyst.

In its periodic assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the funds.

Set forth below are the names, years of birth, positions with the Trust, lengths and term of office, and the principal occupations held during at least the last five years of each of the persons currently serving as

officers of the Trust. The address of J. Garrett Stevens, Richard Hogan, and James J. Baker is c/o Exchange Listed Funds Trust, 10900 Hefner Pointe Drive, Suite 207, Oklahoma City, Oklahoma 73120, the address of Christopher W. Roleke and Ann Edgeworth is Foreside, 10 High Street, Suite 302, Boston, MA 02110.

OFFICERS

Name, Address, and Year of Birth	Position(s) Held with the Trust	Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years
J. Garrett Stevens (1981)	President	Since 2012	Investment Advisor/Vice President, T.S. Phillips Investments, Inc. 2000 -2011; Chief Executive Officer and Secretary. Exchange Traded Concepts Trust 2009 - 2011; Chief Executive Officer, Exchange Traded Concepts, LLC 2009-present; President, Exchange Traded Concepts Trust 2011-present
Richard Hogan (1963)	Trustee and Secretary	Since 2012	Director, Exchange Traded Concepts, LLC 2011-present; Private Investor 2002-present; Secretary, Exchange Traded Concepts Trust 2011-present; Managing Member, Yorkville ETF Advisors 2011-2016
Christopher W. Roleke (1972)	Treasurer	Since 2012	Managing Director/Fund Principal Financial Officer, Foreside Management Services, LLC 2011-Present; Assistant Vice President, JPMorgan Investor Services Co. 2006 – 2011.
James J. Baker Jr. (1951)	Assistant Treasurer	Since 2015	Exchange Traded Concepts, LLC, 2011 to present — Managing Partner; Yorkville ETF Advisors, 2012 to present — Managing Partner; Goldman Sachs, 2000 to 2011 — Vice President.
Ann Edgeworth (1961)	Chief Compliance Officer	Since 2012	Managing Director, Foreside Fund Officer Services, LLC 2010-present; Vice President, State Street 2007-2010.

COMPENSATION OF THE TRUSTEES

The following table sets forth the compensation paid to the Trustees of the Trust for the fiscal year ended November 30, 2016. Independent Trustee fees are paid from the unitary fee paid to the Adviser by the Fund. Trustee compensation does not include reimbursed out-of-pocket expenses in connection with attendance at meetings.

Name	Aggregate Compensation¹	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Trust and Fund Complex²
<u>Interested Trustee</u>				
Richard Hogan	\$0	n/a	n/a	\$0 for service on (1) board
<u>Independent Trustees</u>				
Timothy J. Jacoby	\$49,000	n/a	n/a	\$99,000 for service on (2) boards
David M. Mahle	\$44,000	n/a	n/a	\$89,000 for service on (2) boards
Kurt Wolfgruber	\$44,000	n/a	n/a	\$89,000 for service on (2) boards

¹ For the fiscal year ended November 30, 2016, as compensation for service on the Trust's Board, the Trustees were entitled to receive a \$35,000 annual base fee, as well as a \$2,500 fee for each in-person meeting and a \$1,000 fee for each telephonic meeting. In addition, Mr. Jacoby received a \$5,000 annual fee for his service as Audit Committee chair.

² For the fiscal year ended November 30, 2016, for their service on the Board of Trustees of Exchange Traded Concepts Trust in the Fund Complex, Mr. Jacoby, Mr. Wolfgruber and Mr. Mahle each received a \$35,000 annual base fee, as well as a \$2,500 fee for each in-person meeting (or, if both Trusts in the Fund complex met, \$4,000 per day, whichever is lower), and a \$1,000 fee for each telephonic meeting. In addition, Mr. Jacoby received a \$5,000 annual fee for his service as Audit Committee chair.

BOARD COMMITTEES

The Board has established the following standing committees:

Audit Committee. The Board has a standing Audit Committee that is composed of each of the independent Trustees of the Trust. Mr. Jacoby serves as Chair. The Audit Committee operates under a written charter approved by the Board. The principal responsibilities of the Audit Committee include: recommending which firm to engage as the Fund's independent registered public accounting firm and whether to terminate this relationship; reviewing the independent registered public accounting firm's compensation, the proposed scope and terms of its engagement, and the firm's independence; pre-approving audit and non-audit services provided by the Fund's independent registered public accounting firm to the Trust and certain other affiliated entities; serving as a channel of communication between the independent registered public accounting firm and the Trustees; reviewing the results of each external audit, including any qualifications in the independent registered public accounting firm's opinion, any related management letter, management's responses to recommendations made by the independent registered public accounting firm in connection with the audit, reports submitted to the Committee by the internal auditing department of the Trust's Administrator that are material to the Trust as a whole, if any, and management's responses to any such reports; reviewing each Fund's audited financial statements and considering any significant disputes between the Trust's management and the independent registered public accounting firm that arose in connection with the preparation of those financial statements; considering, in consultation with the independent registered public accounting firm and the Trust's senior internal accounting executive, if any, the independent registered public accounting firms' report on the adequacy of the Trust's internal financial controls; reviewing, in consultation with the Fund's independent registered public accounting firm, major

changes regarding auditing and accounting principles and practices to be followed when preparing the Fund’s financial statements; and other audit related matters.

Governance and Nominating Committee. The Board has a standing Governance and Nominating Committee that is composed of each of the independent Trustees of the Trust. Mr. Mahle serves as Chair. The Governance and Nominating Committee operates under a written charter approved by the Board. The principal responsibility of the Governance and Nominating Committee is to consider, recommend and nominate candidates to fill vacancies on the Trust’s Board, if any. The Governance and Nominating Committee generally will not consider nominees recommended by shareholders.

Valuation Committee. In addition to the foregoing standing committees of the Board, the Trust has a Valuation Committee that may be comprised of representatives from the Adviser, officers of the Trust, representatives from the Fund’s administrator, and/or members of the Board. The Valuation Committee operates under procedures approved by the Board. The Valuation Committee is responsible for the valuation and revaluation of any portfolio investments for which market quotations or prices are not readily available. The Valuation Committee meets periodically, as necessary.

OWNERSHIP OF FUND SHARES

The following table shows the dollar amount ranges of each Trustee’s “beneficial ownership” of Shares of the Fund and each other series of the Trust as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the Securities Exchange Act of 1934 (the “Exchange Act”).

Name	Saba Closed-End Funds ETF	Aggregate Dollar Range of Fund Shares (All Funds in the Complex)
<u>Interested Trustee</u>		
Richard Hogan	None	None
<u>Independent Trustees</u>		
Timothy J. Jacoby	None	None
David M. Mahle	None	None
Kurt Wolfgruber	None	None

CODES OF ETHICS

The Trust, the Adviser, the Sub-Adviser and Foreside Financial Group, LLC (on behalf of the Distributor and its affiliates) have each adopted codes of ethics pursuant to Rule 17j-1 of the 1940 Act. These codes of ethics are designed to prevent affiliated persons of the Trust, the Adviser, the Sub-Adviser and Foreside Financial Group (on behalf of the Distributor, Foreside Management Services, LLC and Foreside Compliance Services, LLC) from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by the Fund. These codes of ethics permit, subject to certain conditions, personnel of each of those entities to invest in securities, including those that may be purchased or held by the Fund.

There can be no assurance that the codes of ethics will be effective in preventing such activities. Each code of ethics, filed as exhibits to this registration statement, may be examined at the office of the SEC in Washington, D.C. or on the Internet at the SEC’s website at www.sec.gov.

PROXY VOTING POLICIES

The Board has delegated the responsibility to vote proxies for securities held in the Fund's portfolios to the Adviser. Proxies for the portfolio securities are voted in accordance with the Adviser's proxy voting guidelines, which are set forth in Exhibit B to this SAI. To the extent the Fund invests in investment companies pursuant to Section 12(d)(1)(F) of the 1940 Act, it must comply with the following voting restrictions: when the Fund exercises voting rights, by proxy or otherwise, with respect to investment companies owned by the Fund, the Fund will either seek instruction from the Fund's shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or vote the shares held by the Fund in the same proportion as the vote of all other holders of the securities of the investment company.

Information regarding how the Fund voted proxies relating to its portfolio securities during the most recent twelve-month period ended June 30 will be available: (1) without charge by calling 1-212-542-4644; (2) on the Fund's website at www.sabaetf.com; and (3) on the SEC's website at www.sec.gov.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

As of the date of this SAI, there were no beneficial owners of the Fund.

INVESTMENT ADVISORY AND OTHER SERVICES

Adviser. Exchange Traded Concepts, LLC, an Oklahoma limited liability company located at 10900 Hefner Pointe Drive, Suite 207, Oklahoma City, Oklahoma 73120, serves as the investment adviser to the Fund. The Adviser is majority owned by Cottonwood ETF Holdings LLC.

The Trust and the Adviser have entered into an investment advisory agreement (the "Advisory Agreement") with respect to the Fund. Under the Advisory Agreement, the Adviser provides investment advice to the Fund primarily in the form of oversight of the Sub-Adviser, including daily monitoring of the purchase and sale of securities by the Sub-Adviser and regular review of the Sub-Adviser's performance. The Adviser, in consultation with the Sub-Adviser, arranges for transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for the Fund to operate. The Adviser administers the Fund's business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services, and provides its officers and employees to serve as officers or Trustees of the Trust.

For the services it provides to the Fund, the Fund pays the Adviser a fee, which is calculated daily and paid monthly at an annual rate of 1.10% of the average daily net assets of the Fund.

Under the Advisory Agreement, the Adviser has agreed to pay all expenses incurred by the Trust except for the advisory fee, interest, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, extraordinary expenses, and distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act (the "Excluded Expenses").

After the initial two-year term, the continuance of the Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the shareholders of the Fund; and (ii) by the vote of a majority of the Trustees who are not parties to the Advisory Agreement or "interested persons" or of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Trustees of the Trust or, with respect to the Fund, by a majority of the

outstanding voting securities of the Fund, or by the Adviser on not more than sixty (60) days' nor less than thirty (30) days' written notice to the Trust. As used in the Advisory Agreement, the terms "majority of the outstanding voting securities," "interested persons" and "assignment" have the same meaning as such terms in the 1940 Act.

The Trust and the Adviser have obtained exemptive relief, *In the Matter of Exchange Traded Concepts Trust, et al.*, Investment Company Act Release Nos. 31453 (February 10, 2015) (Notice) and 31502 (March 10, 2015) (the "Order"), pursuant to which the Adviser may, with Board approval but without shareholder approval, change or select new sub-advisers, materially amend the terms of an agreement with a sub-adviser (including an increase in its fee), or continue the employment of a sub-adviser after an event that would otherwise cause the automatic termination of services, subject to the conditions of the Order. Shareholders will be notified of any sub-adviser changes.

Sub-Adviser. The Adviser has retained Saba Capital Management, L.P., or the Sub-Adviser, to serve as a sub-adviser to the Fund. The Sub-Adviser is a Delaware limited partnership and commenced operations in 2009. It became a registered investment adviser with the SEC on August 6, 2010 and became a registered commodity pool operator with the National Futures Association on January 7, 2013. The Sub-Adviser is majority-owned by Boaz Weinstein. Saba Capital Management GP, LLC, the general partner of the Sub-Adviser, has ultimate responsibility for the management, operations, and investment decisions made by the Sub-Adviser.

The Sub-Adviser is responsible for making investment decisions for the Fund and continuously reviewing, supervising and administering the investment program of the Fund, subject to the supervision of the Adviser and the Board. The Sub-Adviser is also responsible for trading securities on behalf of the Fund, including selecting broker-dealers to execute purchase and sale transactions. Under a sub-advisory agreement between the Adviser and the Sub-Adviser (the "Investment Sub-Advisory Agreement"), the Adviser pays the Sub-Adviser a fee, calculated daily and paid monthly, at an annual rate as follows: 1.01% on up to \$500 million in assets; 1.02% on the next \$500 million; 1.04% on amounts over \$1 billion.

Under the Investment Sub-Advisory Agreement, the Sub-Adviser agrees to sub-license the use of the Sub-Adviser's name to the Adviser and assumes the obligation of the Adviser to pay, or cause to be paid, all expenses of the Fund, except the Excluded Expenses. Prior to the Fund's inception, the Sub-Adviser collaborated with the Adviser on the development of an investment program for the Fund.

After the initial two-year term, the continuance of the Investment Sub-Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the shareholders of the Fund; and (ii) by the vote of a majority of the Trustees who are not parties to the Investment Sub-Advisory Agreement or "interested persons" or of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. The Investment Sub-Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Trustees of the Trust. The Investment Sub-Advisory Agreement also may be terminated, at any time, by the Board or the Adviser upon sixty (60) days' written notice to the Sub-Adviser or by the Sub-Adviser upon sixty (60) days' written notice to the Adviser and the Board. As used in the Investment Sub-Advisory Agreement, the terms "majority of the outstanding voting securities," "interested persons" and "assignment" have the same meaning as such terms in the 1940 Act.

THE PORTFOLIO MANAGERS

Boaz Weinstein and Pierre Weinstein (not related) serve as the Fund's portfolio managers (the "Portfolio Managers"). This section includes information about the Portfolio Managers, including information about other accounts each Portfolio Manager manages and the Portfolio Managers' compensation.

Portfolio Manager Compensation. The Portfolio Managers are compensated by the Sub-Adviser and do not receive any compensation directly from the Fund or the Adviser. Each Portfolio Manager receives a base salary and is eligible to earn discretionary bonuses from time to time. The availability and amount of any bonus will be based on factors such as the Sub-Adviser’s profitability and each Portfolio Manager’s individual performance and team contribution. Neither Portfolio Manager is compensated based on Fund performance or on the value of assets held in the Fund’s portfolio.

Fund Shares Owned by Portfolio Managers. The Fund is required to show the dollar range of each Portfolio Manager’s “beneficial ownership” of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the Exchange Act. As of the date of this SAI, the Portfolio Managers beneficially owned no shares of the Fund.

Other Accounts Managed by Portfolio Managers. In addition to the Fund, as of February 28, 2017, the Portfolio Managers are responsible for the day-to-day management of certain other accounts, as follows:

Name	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Boaz Weinstein	0	0	8*	1,598*	0	0
Pierre Weinstein	0	0	0	0	0	0

* Includes approximately \$1.481 billion in total assets subject to a performance-based advisory fee .

Conflicts of Interest. The Portfolio Managers’ management of “other accounts” may give rise to potential conflicts of interest in connection with the management of the Fund’s investments, on the one hand, and the investments of the Portfolio Managers’ other accounts, on the other. The other accounts may have the same investment objectives as the Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby a Portfolio Manager could favor one account over another. Another potential conflict could include the Portfolio Managers’ knowledge about the size, timing and possible market impact of Fund trades, whereby the Portfolio Managers could use this information to the advantage of other accounts and to the disadvantage of the Fund. However, the Sub-Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts managed by its Portfolio Managers are fairly and equitably allocated.

THE DISTRIBUTOR

The Trust and Foreside Fund Services, LLC (the “Distributor”) are parties to a distribution agreement (“Distribution Agreement”) whereby the Distributor acts as principal underwriter for the Trust’s shares and distributes the Shares of the Fund. Shares are continuously offered for sale by the Distributor only in Creation Units. Each Creation Unit is made up of at least 25,000 Shares. The Distributor will not distribute Shares in amounts less than a Creation Unit. The principal business address of the Distributor is Three Canal Plaza, Suite 100, Portland, Maine 04101.

The Distributor will deliver prospectuses and, upon request, Statements of Additional Information to persons purchasing Creation Units and will maintain records of orders placed with it. The Distributor is a broker-dealer registered under the Exchange Act and a member of the Financial Industry Regulatory Authority (“FINRA”).

The Distributor may enter into agreements with securities dealers wishing to purchase Creation Units if such securities dealers qualify as Authorized Participants (as discussed in "Procedures for Creation of Creation Units" below).

The Distribution Agreement will continue for two years from its effective date and is renewable thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the shareholders of the Fund and (ii) by the vote of a majority of the Trustees who are not "interested persons" of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement is terminable without penalty by the Trust on 60 days' written notice when authorized either by majority vote its outstanding voting shares or by a vote of a majority of its Board (including a majority of the Independent Trustees), or by the Distributor on 60 days' written notice, and will automatically terminate in the event of its assignment. The Distribution Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Distributor, or reckless disregard by it of its obligations thereunder, the Distributor shall not be liable for any action or failure to act in accordance with its duties thereunder.

The Distributor may also provide trade order processing services pursuant to a services agreement.

Distribution Plan. The Trust has adopted a Distribution Plan (the "Plan") in accordance with the provisions of Rule 12b-1 under the 1940 Act, which regulates circumstances under which an investment company may directly or indirectly bear expenses relating to the distribution of its shares. No payments pursuant to the Plan will be made during the initial twelve (12) months of operation. Continuance of the Plan must be approved annually by a majority of the Trustees of the Trust and by a majority of the Trustees who are not interested persons (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the Plan or in any agreements related to the Plan ("Qualified Trustees"). The Plan requires that quarterly written reports of amounts spent under the Plan and the purposes of such expenditures be furnished to and reviewed by the Trustees. The Plan may not be amended to increase materially the amount that may be spent thereunder without approval by a majority of the outstanding shares of any class of the Fund that is affected by such increase. All material amendments of the Plan will require approval by a majority of the Trustees of the Trust and of the Qualified Trustees.

The Plan provides that Shares of the Fund pay the Distributor an annual fee of up to a maximum of 0.25% of the average daily net assets of the Shares. Under the Plan, the Distributor may make payments pursuant to written agreements to financial institutions and intermediaries such as banks, savings and loan associations and insurance companies including, without limit, investment counselors, broker-dealers and the Distributor's affiliates and subsidiaries (collectively, "Agents") as compensation for services and reimbursement of expenses incurred in connection with distribution assistance. The Plan is characterized as a compensation plan since the distribution fee will be paid to the Distributor without regard to the distribution expenses incurred by the Distributor or the amount of payments made to other financial institutions and intermediaries. The Trust intends to operate the Plan in accordance with its terms and with the Financial Industry Regulatory Authority ("FINRA") rules concerning sales charges.

Under the Plan, subject to the limitations of applicable law and regulations, the Fund is authorized to compensate the Distributor up to the maximum amount to finance any activity primarily intended to result in the sale of Creation Units of the Fund or for providing or arranging for others to provide shareholder services and for the maintenance of shareholder accounts. Such activities may include, but are not limited to: (i) delivering copies of the Fund's then current reports, prospectuses, notices, and similar materials, to prospective purchasers of Creation Units; (ii) marketing and promotional services, including advertising; (iii) paying the costs of and compensating others, including Authorized Participants with whom the Distributor has entered into written Authorized Participant Agreements, for performing shareholder

servicing on behalf of the Fund; (iv) compensating certain Authorized Participants for providing assistance in distributing the Creation Units of the Fund, including the travel and communication expenses and salaries and/or commissions of sales personnel in connection with the distribution of the Creation Units of the Fund; (v) payments to financial institutions and intermediaries such as banks, savings and loan associations, insurance companies and investment counselors, broker-dealers, mutual fund supermarkets and the affiliates and subsidiaries of the Trust's service providers as compensation for services or reimbursement of expenses incurred in connection with distribution assistance; (vi) facilitating communications with beneficial owners of shares, including the cost of providing (or paying others to provide) services to beneficial owners of shares, including, but not limited to, assistance in answering inquiries related to shareholder accounts, and (vi) such other services and obligations as are set forth in the Distribution Agreement.

THE ADMINISTRATORS

The Bank of New York Mellon ("BNY Mellon") and UMB Fund Services ("UMBFS") serve as administrators to the Fund.

For services provided under the Administration Agreements, BNY Mellon and UMBFS are each entitled to a fee paid by the Adviser, based on assets under management, subject to a minimum fee.

ETF SERVICES PROVIDER

The Sub-Adviser has engaged Vident Investment Advisory, LLC ("Vident") to provide the Sub-Adviser with various ETF-related services with respect to the Fund. The Sub-Adviser and Vident have entered into an agreement with respect to the Fund, pursuant to which Vident provides services relating to, among others: the daily reconciliation of cash and holdings, cash collateral accounts, corporate action management, and compliance reporting. Vident also assists with monitoring the Fund's bid-ask spreads and premiums and discounts to NAV. Vident does not make investment decisions, provide investment advice, or otherwise act in the capacity of an investment adviser to the Fund.

THE CUSTODIAN

BNY Mellon serves as the custodian of the Fund (the "Custodian"). The Custodian holds cash, securities and other assets of the Fund as required by the 1940 Act.

THE TRANSFER AGENT

BNY Mellon serves as transfer agent and dividend disbursing agent of the Fund.

COMPLIANCE SERVICES

Under a Fund CCO Agreement (the "CCO Agreement") with the Trust, Foreside Fund Officer Services, LLC, an affiliate of the Distributor, provides a Chief Compliance Officer ("CCO") as well as certain additional compliance support functions ("Compliance Services"). The CCO Agreement with respect to the Fund continues in effect until terminated. The CCO Agreement is terminable with or without cause and without penalty by the Board or by Foreside Fund Officer Services, LLC with respect to the Fund on 60 days' written notice to the other party. Notwithstanding the foregoing, the Board will have the right to remove the CCO at any time, with or without cause, without the payment of any penalty.

LEGAL COUNSEL

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue, NW, Washington, DC 20004, serves as legal counsel to the Trust.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Cohen & Company, Ltd., located at 1350 Euclid Avenue, Suite 800, Cleveland, Ohio, serves as the independent registered public accounting firm for the Fund.

PORTFOLIO TRANSACTIONS AND BROKERAGE

The policy of the Trust regarding purchases and sales of securities for the Fund is that primary consideration will be given to obtaining the most favorable prices and efficient executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Trust's policy is to pay commissions which are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Trust believes that a requirement always to seek the lowest possible commission cost could impede effective portfolio management and preclude the Fund and the Sub-Adviser from obtaining a high quality of brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Sub-Adviser will rely upon its experience and knowledge regarding commissions generally charged by various brokers and on its judgment in evaluating the brokerage services received from the broker effecting the transaction. Such determinations are necessarily subjective and imprecise, and in most cases, exact dollar values for those services are not ascertainable. The Trust has adopted policies and procedures that prohibit the consideration of sales of the Fund's shares as a factor in the selection of a broker or dealer to execute its portfolio transactions.

The Sub-Adviser owes a fiduciary duty to its clients to seek to provide best execution on trades effected. In selecting a broker/dealer for each specific transaction, the Sub-Adviser chooses the broker/dealer deemed most capable of providing the services necessary to obtain the most favorable execution. The Sub-Adviser uses several brokerage firms for execution services who specialize in index management as well as agency and principal trading. To the extent that the Sub-Adviser engages in brokerage transactions with a broker-dealer that is an affiliated person, it will do so in accordance with applicable law. The Sub-Adviser's use of an affiliated broker-dealer creates a potential conflict of interest to favor an affiliate. The Sub-Adviser's brokerage allocation process and best execution reviews seek to identify and address potential conflicts of interest.

Best execution is generally understood to mean the most favorable cost or net proceeds reasonably obtainable under the circumstances. The full range of brokerage services applicable to a particular transaction may be considered when making this judgment, which may include, but is not limited to: liquidity, price, commission, timing, aggregated trades, capable floor brokers or traders, competent block trading coverage, ability to position, capital strength and stability, reliable and accurate communications and settlement processing, use of automation, knowledge of other buyers or sellers, arbitrage skills, administrative ability, underwriting and provision of information on a particular security or market in which the transaction is to occur. The specific criteria will vary depending upon the nature of the transaction, the market in which it is executed, and the extent to which it is possible to select from among multiple broker/dealers. The Sub-Adviser will also use electronic crossing networks ("ECNs") when appropriate.

Section 28(e) of the 1934 Act permits the Sub-Adviser, under certain circumstances, to cause the Fund to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission

another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. The Sub-Adviser may receive a variety of research services and information on many topics, which it can use in connection with its management responsibilities with respect to the various accounts over which it exercises investment discretion or otherwise provides investment advice. The research services may include qualifying order management systems, portfolio attribution and monitoring services and computer software and access charges which are directly related to investment research. Accordingly, the Fund may pay a broker commission higher than the lowest available in recognition of the broker's provision of such services to the Sub-Adviser, but only if the Sub-Adviser determines the total commission (including the soft dollar benefit) is comparable to the best commission rate that could be expected to be received from other brokers. The amount of soft dollar benefits received depends on the amount of brokerage transactions effected with the brokers. A conflict of interest exists because there is an incentive to: 1) cause clients to pay a higher commission than the firm might otherwise be able to negotiate; 2) cause clients to engage in more securities transactions than would otherwise be optimal; and 3) only recommend brokers that provide soft dollar benefits.

The Sub-Adviser faces a potential conflict of interest when it uses client trades to obtain brokerage or research services. This conflict exists because the Sub-Adviser is able to use the brokerage or research services to manage client accounts without paying cash for such services, which reduces the Sub-Adviser's expenses to the extent that the Sub-Adviser would have purchased such products had they not been provided by brokers. Section 28(e) permits the Sub-Adviser to use brokerage or research services for the benefit of any account it manages. Certain accounts managed by the Sub-Adviser may generate soft dollars used to purchase brokerage or research services that ultimately benefit other accounts managed by the Sub-Adviser, effectively cross subsidizing the other accounts managed by the Sub-Adviser that benefit directly from the product. The Sub-Adviser may not necessarily use all of the brokerage or research services in connection with managing the Fund whose trades generated the soft dollars used to purchase such products.

Neither the Adviser nor the Sub-Adviser currently uses the Fund's assets for, or participates in, any third party soft dollar arrangements, although they may do so in the future. However, they may receive proprietary research from various full service brokers, the cost of which is bundled with the cost of the broker's execution services. The Adviser and the Sub-Adviser do not "pay up" for the value of any such proprietary research.

The Sub-Adviser is responsible, subject to oversight by the Adviser and the Board, for placing orders on behalf of the Fund for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of the Fund and one or more other investment companies or clients supervised by the Sub-Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable and consistent with its fiduciary obligations to all by the Sub-Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as the Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to the Fund. The primary consideration is prompt execution of orders at the most favorable net price.

The Fund may deal with affiliates in principal transactions to the extent permitted by exemptive order or applicable rule or regulation.

Brokerage with Fund Affiliates. The Fund may execute brokerage or other agency transactions through registered broker-dealer affiliates of the Fund, the Adviser, the Sub-Adviser or the Distributor for a commission in conformity with the 1940 Act, the Exchange Act and rules promulgated by the SEC. These rules further require that commissions paid to the affiliate by the Fund for exchange transactions not

exceed “usual and customary” brokerage commissions. The rules define “usual and customary” commissions to include amounts which are “reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time.” The Board, including those members who are not “interested persons” of the Fund, has adopted procedures for evaluating the reasonableness of commissions paid to affiliates and reviews these procedures periodically.

Securities of “Regular Broker-Dealers.” The Fund is required to identify any securities of its “regular brokers and dealers” (as such term is defined in the 1940 Act) which the Fund may hold at the close of its most recent fiscal year. “Regular brokers or dealers” of the Fund are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Fund’s portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Fund; or (iii) sold the largest dollar amounts of the Fund’s shares.

As of the date of this SAI, the Fund did not hold any securities of its “regular brokers and dealers.”

DESCRIPTION OF SHARES

The Declaration of Trust authorizes the issuance of an unlimited number of funds and shares of the fund. Each share of the Fund represents an equal proportionate interest in the Fund with each other share. Shares are entitled upon liquidation to a pro rata share in the net assets of the Fund. Shareholders have no preemptive rights. The Declaration of Trust provides that the Trustees of the Trust may create additional series or classes of shares. All consideration received by the Trust for shares of any additional funds and all assets in which such consideration is invested would belong to that fund and would be subject to the liabilities related thereto. Share certificates representing shares will not be issued. The Fund’s shares, when issued, are fully paid and non-assessable.

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shares of all funds vote together as a single class, except that if the matter being voted on affects only a particular Fund it will be voted on only by that Fund and if a matter affects a particular Fund differently from other Funds, that Fund will vote separately on such matter. As a Delaware statutory trust, the Trust is not required, and does not intend, to hold annual meetings of shareholders. Approval of shareholders will be sought, however, for certain changes in the operation of the Trust and for the election of Trustees under certain circumstances.

Under the Declaration of Trust, the Trustees have the power to liquidate the Fund without shareholder approval. While the Trustees have no present intention of exercising this power, they may do so if the Fund fails to reach a viable size within a reasonable amount of time or for such other reasons as may be determined by the Board.

LIMITATION OF TRUSTEES’ LIABILITY

The Declaration of Trust provides that a Trustee shall be liable only for his or her own willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee, and shall not be liable for errors of judgment or mistakes of fact or law. The Trustees shall not be responsible or liable in any event for any neglect or wrong-doing of any officer, agent, employee, investment adviser or principal underwriter of the Trust, nor shall any Trustee be responsible for the act or omission of any other Trustee. The Declaration of Trust also provides that The Trust shall indemnify each person who is, or has been, a Trustee, officer, employee or agent of the Trust, any person who is serving or has served at the Trust’s request as a Trustee, officer, trustee, employee or agent of another organization in

which the Trust has any interest as a shareholder, creditor or otherwise to the extent and in the manner provided in the By-Laws. However, nothing in the Declaration of Trust shall protect or indemnify a Trustee against any liability for his or her willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee. Nothing contained in this section attempts to disclaim a Trustee's individual liability in any manner inconsistent with the federal securities laws.

BOOK ENTRY ONLY SYSTEM

Depository Trust Company ("DTC") acts as securities depository for the Fund's shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee, Cede & Co., and deposited with, or on behalf of, DTC. Except in limited circumstances set forth below, certificates will not be issued for the Fund's shares.

DTC is a limited-purpose trust company that was created to hold securities of its participants (the "DTC's Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers, and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of Shares is limited to DTC Participants, Indirect Participants, and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in Shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of Shares. The Trust recognizes DTC or its nominee as the record owner of all Shares for all purposes. Beneficial Owners of Shares are not entitled to have Shares registered in their names, and will not receive or be entitled to physical delivery of share certificates. Each Beneficial Owner must rely on the procedures of DTC and any DTC Participant and/or Indirect Participant through which such Beneficial Owner holds its interests, to exercise any rights of a holder of Shares.

Conveyance of all notices, statements, and other communications to Beneficial Owners is effected as follows. DTC will make available to the Trust upon request and for a fee a listing of Shares held by each DTC Participant. The Trust shall obtain from each such DTC Participant the number of Beneficial Owners holding Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement, or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all Shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in the

Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in the Fund's Shares, or for maintaining, supervising, or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the Fund at any time by giving reasonable notice to the Fund and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Fund shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such replacement is unavailable, to issue and deliver printed certificates representing ownership of Shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

CREATION AND REDEMPTION OF CREATION UNITS

Creation

The Trust issues and sells shares of the Fund only in Creation Units on a continuous basis through the Distributor, at their NAV next determined after receipt, on any Business Day (as defined below), of an order received in proper form.

A "Business Day" with respect to the Fund is any day on which the Exchange is open for business. As of the date of the Prospectus, the Exchange observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, President's Day (Washington's Birthday), Good Friday, Memorial Day (observed), Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Fund Deposit. The consideration for purchase of a Creation Unit of the Fund generally consists of an in-kind deposit of a designated portfolio of securities – the "Deposit Securities" – per each Creation Unit constituting a substantial replication, or a representation, of the securities included in the Fund's portfolio and an amount of cash – the Cash Component – computed as described below. Together, the Deposit Securities and the Cash Component constitute the "Fund Deposit," which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The Cash Component is an amount equal to the difference between the NAV of the shares (per Creation Unit) and the market value of the Deposit Securities. If the Cash Component is a positive number (*i.e.*, the NAV per Creation Unit exceeds the market value of the Deposit Securities), the Cash Component shall be such positive amount. If the Cash Component is a negative number (*i.e.*, the NAV per Creation Unit is less than the market value of the Deposit Securities), the Cash Component shall be such negative amount and the creator will be entitled to receive cash from the Fund in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the market value of the Deposit Securities.

The Administrator, through the National Securities Clearing Corporation ("NSCC") (discussed below), makes available on each Business Day, immediately prior to the opening of business on the Exchange

(currently 9:30 a.m., Eastern Time), the list of the names and the required number of shares of each Deposit Security to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for the Fund. Such Fund Deposit is applicable, subject to any adjustments as described below, in order to effect creations of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities is made available.

The identity and number of shares of the Deposit Securities required for a Fund Deposit for the Fund changes as rebalancing adjustments and corporate action events are reflected from time to time by the Sub-Adviser to the Fund with a view to the investment objectives of the Fund. In addition, the Trust reserves the right to permit or require the substitution of an amount of cash – *i.e.*, a “cash in lieu” amount – to be added to the Cash Component to replace any Deposit Security which may not be available in sufficient quantity for delivery or which may not be eligible for transfer through the Clearing Process (discussed below), or which may not be eligible for trading by an Authorized Participant (as defined below) or the investor for which it is acting. The Trust also reserves the right to offer an “all cash” option for creations of Creation Units for the Fund.

In addition to the list of names and quantities of securities constituting the current Deposit Securities of a Fund Deposit, the Administrator, through the NSCC, also makes available on each Business Day, the estimated Cash Component, effective through and including the previous Business Day, per outstanding Creation Unit of the Fund.

Procedures for Creation of Creation Units. To be eligible to place orders with the Distributor to create a Creation Unit of the Fund, an entity must be (i) a “Participating Party,” *i.e.*, a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC; or (ii) a DTC Participant (see “Book Entry Only System”), and, in each case, must have executed an agreement with the Trust, the Distributor and the Administrator with respect to creations and redemptions of Creation Units (“Participant Agreement”) (discussed below). A Participating Party and DTC Participant are collectively referred to as an “Authorized Participant.” Investors should contact the Distributor for the names of Authorized Participants that have signed a Participant Agreement with the Fund. All shares of the Fund, however created, will be entered on the records of DTC in the name of Cede & Co. for the account of a DTC Participant.

All orders to create Creation Units must be placed for one or more Creation Unit size aggregations of at least 25,000 shares. All orders to create Creation Units, whether through the Clearing Process (through a Participating Party) or outside the Clearing Process (through a DTC Participant), must be received by the Administrator no later than 3:00 p.m., Eastern Time, an hour earlier than the close of the regular trading session on the Exchange (ordinarily 4:00 p.m., Eastern Time) (“Closing Time”), in each case on the date such order is placed in order for the creation of Creation Units to be effected based on the NAV of shares of the Fund as next determined on such date after receipt of the order in proper form. The date on which an order to create Creation Units (or an order to redeem Creation Units as discussed below) is placed is referred to as the “Transmittal Date.” Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Administrator and the Distributor pursuant to procedures set forth in the Participant Agreement, as described below (see “Placement of Creation Orders Using Clearing Process” and “Placement of Creation Orders Outside Clearing Process”). Severe economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Administrator, the Distributor or an Authorized Participant.

If permitted by the Sub-Adviser in its sole discretion with respect to the Fund, an Authorized Participant may also agree to enter into or arrange for an exchange of a futures contract for related position (“EFCRP”) or block trade with the Fund whereby the Authorized Participant would also transfer to the

Fund a number and type of exchange-traded futures contracts at or near the closing settlement price for such contracts on the purchase order date. Similarly, the Sub-Adviser in its sole discretion may agree with an Authorized Participant to use an EFCRP or block trade to effect an order to redeem Creation Units.

An EFCRP is a technique permitted by the rules of certain futures exchanges that, as utilized by the Fund in the Sub-Adviser's discretion, would allow the Fund to take a position in a futures contract from an Authorized Participant, or give futures contracts to an Authorized Participant, in the case of a redemption, rather than to enter the futures exchange markets to obtain such a position. An EFCRP by itself will not change either party's net risk position materially. Because the futures position that the Fund would otherwise need to take in order to meet its investment objective can be obtained without unnecessarily impacting the financial or futures markets or their pricing, EFCRPs can generally be viewed as transactions beneficial to the Fund. A block trade is a technique that permits the Fund to obtain a futures position without going through the market auction system and can generally be viewed as a transaction beneficial to the Fund.

Orders to create Creation Units of the Fund shall be placed with an Authorized Participant, as applicable, in the form required by such Authorized Participant. In addition, the Authorized Participant may request the investor to make certain representations or enter into agreements with respect to the order, *i.e.*, to provide for payments of cash, when required. Investors should be aware that their particular broker may not have executed a Participant Agreement and, therefore, orders to create Creation Units of the Fund have to be placed by the investor's broker through an Authorized Participant that has executed a Participant Agreement. At any given time there may be only a limited number of broker-dealers that have executed a Participant Agreement. Those placing orders for Creation Units through the Clearing Process should afford sufficient time to permit proper submission of the order to the Distributor prior to 3:00 p.m., Eastern Time, on the Transmittal Date.

Orders for creation that are effected outside the Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the Clearing Process. Those persons placing orders outside the Clearing Process, should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effecting such transfer of Deposit Securities and Cash Component.

Placement of Creation Orders Using the Clearing Process. The Clearing Process is the process of creating or redeeming Creation Units through the Continuous Net Settlement System of the NSCC. Fund Deposits made through the Clearing Process must be delivered through a Participating Party that has executed a Participant Agreement. The Participant Agreement authorizes the Administrator to transmit through the Fund's Transfer Agent to NSCC, on behalf of the Participating Party, such trade instructions as are necessary to effect the Participating Party's creation order. Pursuant to such trade instructions to NSCC, the Participating Party agrees to deliver the requisite Deposit Securities and the Cash Component to the Trust, together with such additional information as may be required by the Distributor or Administrator. An order to create Creation Units through the Clearing Process is deemed received by the Administrator on the Transmittal Date if (i) such order is received by the Administrator not later than 3:00 p.m., Eastern Time and approved by the Distributor on such Transmittal Date and (ii) all other procedures set forth in the Participant Agreement are properly followed.

Placement of Creation Orders Outside the Clearing Process. Fund Deposits made outside the Clearing Process must be delivered through a DTC Participant that has executed a Participant Agreement with the Trust, the Distributor and the Administrator. A DTC Participant who wishes to place an order creating Creation Units to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will instead be effected through a transfer of securities and cash directly through DTC. A

Fund Deposit transfer must be ordered by the DTC Participant on the Transmittal Date in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities through DTC to the account of the Trust by no later than 11:00 a.m., Eastern Time, of the next Business Day immediately following the Transmittal Date. All questions as to the number of Deposit Securities to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding. The cash equal to the Cash Component must be transferred directly to the Administrator through the Federal Reserve wire system in a timely manner so as to be received by the Administrator no later than 2:00 p.m., Eastern Time, on the next Business Day immediately following such Transmittal Date. An order to create Creation Units outside the Clearing Process is deemed received by the Administrator on the Transmittal Date if (i) such order is received by the Administrator not later than 3:00 p.m., Eastern Time and approved by the Distributor on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed. However, if the Administrator does not receive both the requisite Deposit Securities and the Cash Component by 11:00 a.m. and 2:00 p.m., respectively, on the next Business Day immediately following the Transmittal Date, such order will be cancelled. Upon written notice to the Distributor, such cancelled order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the then current NAV of the Fund. The delivery of Creation Units of the Fund so created will occur no later than the third (3rd) Business Day following the day on which the purchase order is deemed received by the Administrator.

Creation Units may be created in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) 105% of the market value of the undelivered Deposit Securities (the "Additional Cash Deposit"). The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to 3:00 p.m., Eastern Time on such date and federal funds in the appropriate amount are deposited with the Administrator by 11:00 a.m., Eastern Time, the following Business Day. If the order is not placed in proper form by 3:00 p.m., Eastern Time or federal funds in the appropriate amount are not received by 11:00 a.m. the next Business Day, then the order may be deemed to be rejected and the investor shall be liable to the Trust for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to 105% of the daily marked to market value of the missing Deposit Securities. To the extent that missing Deposit Securities are not received by 1:00 p.m., Eastern Time, on the third Business Day following the day on which the purchase order is deemed received by the Administrator or in the event a mark to market payment is not made within one Business Day following notification by the Distributor that such a payment is required, the Trust may use the cash on deposit to purchase the missing Deposit Securities. Authorized Participants will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the day the purchase order was deemed received by the Administrator plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Administrator or purchased by the Trust and deposited into the Trust. In addition, a transaction fee will be charged in all cases. The delivery of Creation Units of the Fund so created will occur no later than the third Business Day following the day on which the purchase order is deemed received by the Administrator.

Acceptance of Orders for Creation Units. The Trust reserves the absolute right to reject a creation order transmitted to it by the Administrator in respect of the Fund if (a) the order is not in proper form; (b) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares

of the Fund; (c) the Deposit Securities delivered are not as disseminated through the facilities of the Exchange for that date by the Administrator, as described above; (d) acceptance of the Deposit Securities or Cash Purchase Amount would have certain adverse tax consequences to the Fund; (e) the acceptance of the Fund Deposit or Cash Purchase Amount would, in the opinion of counsel, be unlawful; (f) the acceptance of the Fund Deposit or Cash Purchase Amount would otherwise, in the discretion of the Trust or the Adviser, have an adverse effect on the Trust or the rights of beneficial owners; or (g) in the event that circumstances outside the control of the Trust, the Distributor, the Administrator, and the Adviser make it for all practical purposes impossible to process creation orders. Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Adviser, the Distributor, the Administrator, DTC, NSCC or any other participant in the creation process, and similar extraordinary events. The Distributor shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Trust, the Administrator and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits or Cash Purchase Amounts nor shall either of them incur any liability for the failure to give any such notification.

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

Creation Transaction Fee. To compensate the Trust for transfer and other transaction costs involved in creation transactions through the Clearing Process, investors will be required to pay a minimum creation transaction fee, assessed per transaction, of \$500. An additional Variable Fee of up to a maximum of 2.00% of the value of the Creation Unit (inclusive of any transaction fees charged), may be charged for each creation.

The Fund, subject to approval by the Board, may adjust the Creation Transaction Fee from time to time based upon actual experience. Investors who use the services of a broker or other such intermediary in addition to an Authorized Participant to effect a creation of a Creation Unit may be charged a fee for such services.

Redemption

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Fund through the Administrator and approved by the Distributor and only on a Business Day. The Trust will not redeem shares in amounts less than Creation Units. Beneficial Owners must accumulate enough shares in the secondary market to constitute a Creation Unit in order to have such shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a redeemable Creation Unit.

With respect to the Fund, the Administrator, through the NSCC, makes available immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time) on each Business Day, the "Fund Securities" that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day. Fund Securities received on redemption may not be identical to Deposit Securities which are applicable to creations of Creation Units.

Cash Redemption Amount. Unless cash redemptions are available or specified for the Fund, the redemption proceeds for a Creation Unit generally consist of Fund Securities – as announced by the Administrator on the Business Day of the request for redemption received in proper form – plus cash in an amount equal to the difference between the NAV of the shares being redeemed, as next determined after receipt of a request in proper form, and the value of the Fund Securities (the “Cash Redemption Amount”), less a redemption transaction fee described below in the section entitled “Redemption Transaction Fee”. In the event that the Fund Securities have a value greater than the NAV of the shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder.

Placement of Redemption Orders Using Clearing Process. Orders to redeem Creation Units through the Clearing Process must be delivered through a Participating Party that has executed the Participant Agreement. An order to redeem Creation Units using the Clearing Process is deemed received on the Transmittal Date if (i) such order is received by the Administrator not later than 3:00 p.m., Eastern Time and approved by the Distributor on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed; such order will be effected based on the NAV of the Fund as next determined. An order to redeem Creation Units using the Clearing Process made in proper form but received by the Fund after 3:00 p.m., Eastern Time will be deemed received on the next Business Day immediately following the Transmittal Date and will be effected at the NAV next determined on such Business Day. The requisite Fund Securities and the Cash Redemption Amount will be transferred by the third (3rd) NSCC Business Day following the date on which such request for redemption is deemed received.

Placement of Redemption Orders Outside Clearing Process. Orders to redeem Creation Units outside the Clearing Process must be delivered through a DTC Participant that has executed the Participant Agreement. A DTC Participant who wishes to place an order for redemption of Creation Units to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that redemption of Creation Units will instead be effected through transfer of shares directly through DTC. An order to redeem Creation Units outside the Clearing Process is deemed received by the Administrator on the Transmittal Date if (i) such order is received by the Administrator not later than 3:00 p.m., Eastern Time and approved by the Distributor on such Transmittal Date; (ii) such order is accompanied or proceeded by the requisite number of shares of the Fund and/or the Cash Redemption Amount specified in such order, which delivery must be made through DTC to the Administrator no later than 11:00 a.m. and 2:00 p.m., respectively, Eastern Time, on the next Business Day following such Transmittal Date (the “DTC Cut-Off-Time”); and (iii) all other procedures set forth in the Participant Agreement are properly followed.

After the Administrator has deemed an order for redemption outside the Clearing Process received, the Administrator will initiate procedures to transfer the requisite Fund Securities, which are expected to be delivered within three Business Days, and/or the Cash Redemption Amount to the Authorized Participant, on behalf of the redeeming Beneficial Owner, by the third Business Day following the Transmittal Date on which such redemption order is deemed received by the Administrator.

The calculation of the value of the Fund Securities and the Cash Redemption Amount to be delivered upon redemption will be made by the Administrator according to the procedures set forth under “Determination of Net Asset Value” computed on the Business Day on which a redemption order is deemed received by the Administrator. Therefore, if a redemption order in proper form is submitted to the Administrator by a DTC Participant not later than 3:00 p.m., Eastern Time on the Transmittal Date, and the requisite number of shares of the Fund are delivered to the custodian prior to the DTC Cut-Off-Time, then the value of the Fund Securities and/or the Cash Redemption Amount to be delivered will be determined by the Administrator on such Transmittal Date. If, however, a redemption order is submitted to the Administrator

by a DTC Participant not later than 3:00 p.m., Eastern Time on the Transmittal Date, but either (1) the requisite number of shares of the Fund are not delivered by the DTC Cut-Off-Time as described above on the next Business Day following the Transmittal Date or (2) the redemption order is not submitted in proper form, then the redemption order will not be deemed received as of the Transmittal Date. In such case, the value of the Fund Securities and the Cash Redemption Amount to be delivered will be computed on the Business Day that such order is deemed received by the Administrator, *i.e.*, the Business Day on which the shares of the Fund are delivered through DTC to the Administrator by the DTC Cut-Off-Time on such Business Day pursuant to a properly submitted redemption order.

If it is not possible to effect deliveries of the Fund Securities, the Trust may in its discretion exercise its option to redeem such shares in cash, and the redeeming Beneficial Owner will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash which the Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its shares based on the NAV of shares of the Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). The Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities which differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Fund could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular stock included in the Fund Securities applicable to the redemption of a Creation Unit may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming Beneficial Owner of the shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment, beneficial ownership of shares or delivery instructions. The Trust also reserves the right to offer an "all cash" option for redemptions of Creation Units for the Fund.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the Fund or determination of the shares' NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

Redemption Transaction Fee. To compensate the Trust for transfer and other transaction costs involved in redemption transactions through the Clearing Process, investors will be required to pay a minimum redemption transaction fee, assessed per transaction of \$500. An additional Variable Fee of up to a maximum of 2.00% of the value of the Creation Unit (inclusive of any transaction fees charged), may be charged for each redemption.

The Fund, subject to approval by the Board, may adjust the Redemption Transaction Fee from time to time based upon actual experience. Investors who use the services of a broker or other such intermediary in addition to an Authorized Participant to effect a redemption of a Creation Unit may be charged a fee for such services.

DETERMINATION OF NET ASSET VALUE

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus entitled "Calculating NAV."

The NAV per share of the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of shares of the Fund outstanding, rounded to the nearest cent. Expenses and fees, including without limitation, the management, administration and distribution fees, are accrued daily and taken into account for purposes of determining NAV per share. The NAV per share for the Fund is calculated by the Administrator and determined as of the close of the regular trading session on the Exchange (ordinarily 4:00 p.m., Eastern Time) on each day that such exchange is open.

In computing the Fund's NAV, the Fund's securities holdings are valued based on their last readily available market price. Price information on listed securities, including Underlying Funds in which the Fund invests, is taken from the exchange where the security is primarily traded. Other portfolio securities and assets for which market quotations are not readily available or determined to not represent the current fair value are valued based on fair value as determined in good faith by the Fund's Valuation Committee in accordance with procedures adopted by the Board.

Futures contracts will be valued at the settlement or closing price determined by the applicable exchange. Cash Instruments may be valued at market values, as furnished by recognized dealers in such securities or assets. Cash Instruments also may be valued on the basis of information furnished by an independent pricing service that uses a valuation matrix which incorporates both dealer-supplied valuations and electronic data processing techniques.

Short-term debt securities with remaining maturities of sixty days or less for which market quotations and information furnished by an independent pricing service are not readily available will be valued at market value. Shares of money market mutual funds held by the Fund will be valued at their respective NAVs.

DIVIDENDS AND DISTRIBUTIONS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Dividends, Distributions and Taxes."

General Policies. Dividends from net investment income, if any, are declared and paid annually by the Fund. Distributions of remaining net realized capital gains, if any, generally are declared and paid once a year, but the Fund may make distributions on a more frequent basis for the Fund to improve index tracking or to comply with the distribution requirements of the Internal Revenue Code, in all events in a manner consistent with the provisions of the 1940 Act.

Dividends and other distributions on Shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such Shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Trust.

The Fund makes additional distributions to the extent necessary (i) to distribute the entire annual taxable income of the Fund, plus any net capital gains and (ii) to avoid imposition of the excise tax imposed by Section 4982 of the Internal Revenue Code. Management of the Trust reserves the right to declare special dividends if, in its reasonable discretion, such action is necessary or advisable to preserve the Fund's eligibility for treatment as a regulated investment company ("RIC") or to avoid imposition of income or excise taxes on undistributed income.

Dividend Reinvestment Service. The Trust will not make the DTC book-entry dividend reinvestment service available for use by Beneficial Owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial Owners should be aware that each broker may require investors to adhere to specific procedures and timetables in order to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares issued by the Trust of the Fund at NAV per share. Distributions reinvested in additional Shares of the Fund will nevertheless be taxable to Beneficial Owners acquiring such additional Shares to the same extent as if such distributions had been received in cash.

FEDERAL INCOME TAXES

The following is a summary of certain additional U.S. federal income tax considerations generally affecting the Fund and its shareholders that supplements the summary in the Prospectus. No attempt is made to present a comprehensive explanation of the federal, state, local or foreign tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended to be a substitute for careful tax planning.

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Internal Revenue Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Shareholders are urged to consult their own tax advisers regarding the application of the provisions of tax law described in this SAI in light of the particular tax situations of the shareholders and regarding specific questions as to federal, state, or local taxes.

Regulated Investment Company (RIC) Status. The Fund will seek to qualify and elect to be treated as a RIC under the Internal Revenue Code. By following such a policy, the Fund expects to eliminate or reduce to a nominal amount the federal taxes to which it may be subject. If the Fund qualifies as a RIC, it will generally not be subject to federal income taxes on the net investment income and net realized capital gains that it timely distributes to its shareholders. The Board reserves the right not to maintain the qualification of the Fund as a RIC if it determines such course of action to be beneficial to shareholders.

In order to qualify as a RIC under the Internal Revenue Code, the Fund must distribute annually to its shareholders at least an amount equal to the sum of 90% of the Fund's net investment company taxable income for such year (including, for this purpose, dividends, taxable interest, and the excess of net short-term capital gains over net long-term capital losses, less operating expenses), computed without regard to the dividends-paid deduction, and at least 90% of its net tax-exempt interest income for such year, if any (the "Distribution Requirement") and also must meet certain additional requirements. One of these additional requirements for RIC qualification is that the Fund must receive at least 90% of its gross income each taxable year from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to the Fund's business of investing in stock, securities, foreign currencies and net income from interests in qualified publicly traded partnerships (the "90% Test"). A second requirement for qualification as a RIC is that the Fund must diversify its holdings so that, at the end of each quarter of the Fund's taxable year: (a) at least 50% of

the market value of the Fund's total assets is represented by cash and cash items, U.S. government securities, securities of other RICs, and other securities, with these other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of the Fund's total assets or 10% of the outstanding voting securities of such issuer, including the equity securities of a qualified publicly traded partnership; and (b) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or securities of other RICs) of any one issuer or the securities (other than the securities of another RIC) of two or more issuers that the Fund controls and which are engaged in the same or similar trades or businesses or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the "Asset Test").

If the Fund fails to satisfy the 90% Test or the Asset Test, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain *de minimis* failures of the Asset Test where the Fund corrects the failure within a specified period of time. In order to be eligible for the relief provisions with respect to a failure to meet the Asset Test, the Fund may be required to dispose of certain assets. If these relief provisions are not available to the Fund and it fails to qualify for treatment as a RIC for a taxable year, all of its taxable income would be subject to tax at regular corporate income tax rates without any deduction for distributions to shareholders, and its distributions (including capital gains distributions) generally would be taxable as ordinary income dividends to its shareholders, subject to the dividends-received deduction for corporate shareholders and the lower tax rates on qualified dividend income received by noncorporate shareholders. In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a RIC. The Board reserves the right not to maintain the qualification of the Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders. If the Fund determines that it will not qualify for treatment as a RIC, the Fund will establish procedures to reflect the anticipated tax liability in the Fund's NAV.

Although the Fund intends to distribute substantially all of its net investment income and may distribute its capital gains for any taxable year, the Fund will be subject to federal income taxation to the extent any such income or gains are not distributed.

Notwithstanding the Distribution Requirement described above, the Fund will be subject to a nondeductible 4% federal excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year an amount at least equal to 98% of its ordinary income for the calendar year and 98.2% of its capital gain net income for the twelve months ended October 31 of such year, subject to an increase for any shortfall in the prior year's distribution. For this purpose, any ordinary income or capital gain net income retained by the Fund and subject to corporate income tax will be considered to have been distributed. The Fund intends to declare and distribute dividends and distributions in the amounts and at the times necessary to avoid the application of this 4% excise tax, but can make no assurances that such tax will be completely eliminated. The Fund may in certain circumstances be required to liquidate Fund investments in order to make sufficient distributions to avoid federal excise tax liability at a time when the investment adviser might not otherwise have chosen to do so, and liquidation of investments in such circumstances may affect the ability of the Fund to satisfy the requirement for qualification as a RIC.

The Fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such "qualified late year loss" as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A "qualified late year loss" generally includes net capital loss, net long-term capital loss, or net

short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as “post-October losses”) and certain other late-year losses.

The treatment of capital loss carryovers for the Fund is similar to the rules that apply to capital loss carryovers of individuals, which provide that such losses are carried over indefinitely. If the Fund has a “net capital loss” (that is, capital losses in excess of capital gains), the excess of the Fund’s net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund’s next taxable year, and the excess (if any) of the Fund’s net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund’s next taxable year. In addition, the carryover of capital losses may be limited under the general loss limitation rules if the Fund experiences an ownership change as defined in the Internal Revenue Code.

Taxation of Shareholders. The Fund receives income generally in the form of dividends and interest on investments. This income, plus net short-term capital gains, if any, less expenses incurred in the operation of the Fund, constitutes the Fund’s net investment income from which dividends may be paid to you. Any distributions by the Fund from such income will be taxable to you as ordinary income or at the lower capital gains rates that apply to individuals receiving qualified dividend income, whether you take them in cash or in additional shares.

Subject to certain limitations and requirements, dividends reported by the Fund as qualified dividend income will be taxable to noncorporate shareholders at rates of up to 20%. In general, dividends may be reported by the Fund as qualified dividend income if they are paid from dividends received by the Fund on common and preferred stock of U.S. corporations or on stock of certain eligible foreign corporations, provided that certain holding period and other requirements are met by the Fund with respect to the dividend-paying stocks in its portfolio. Subject to certain limitations, eligible foreign corporations include those incorporated in possessions of the United States or in certain countries with comprehensive tax treaties with the United States, and other foreign corporations if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. A dividend will not be treated as qualified dividend income to the extent that: (i) the shareholder has not held the shares on which the dividend was paid for more than 60 days during the 121-day period that begins on the date that is 60 days before the date on which the shares become “ex-dividend” (which is the day on which declared distributions (dividends or capital gains) are deducted from the Fund’s assets before it calculates the net asset value) with respect to such dividend, (ii) the Fund has not satisfied similar holding period requirements with respect to the securities it holds that paid the dividends distributed to the shareholder), (iii) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to substantially similar or related property, or (iv) the shareholder elects to treat such dividend as investment income under section 163(d)(4)(B) of the Code. Therefore, if you lend your shares in the Fund, such as pursuant to a securities lending arrangement, you may lose the ability to treat dividends (paid while the shares are held by the borrower) as qualified dividend income.

Distributions by the Fund of its net short-term capital gains will be taxable as ordinary income. Capital gain distributions consisting of the Fund’s net capital gains will be taxable as long-term capital gains for individual shareholders currently set at a maximum rate of 20% regardless of how long you have held your shares in the Fund.

In the case of corporate shareholders, the Fund’s distributions (other than capital gain distributions) generally qualify for the dividends-received deduction to the extent such distributions are so reported and do not exceed the gross amount of qualifying dividends received by the Fund for the year. Generally, and subject to certain limitations (including certain holding period limitations), a dividend will be treated as a qualifying dividend if it has been received from a domestic corporation. All such qualifying dividends (including the deducted portion) must be included in your alternative minimum taxable income calculation.

The Fund's participation in loans of securities may affect the amount, timing, and character of distributions to its shareholders. If the Fund participates in a securities lending transaction and receives a payment in lieu of dividends (a "substitute payment") with respect to securities on loan in a securities lending transaction, such income generally will not constitute qualified dividend income and thus dividends attributable to such income will not be eligible for taxation at the rates applicable to qualified dividend income for individual shareholders and will not be eligible for the dividends-received deduction for corporate shareholders.

Although dividends generally will be treated as distributed when paid, any dividend declared by the Fund in October, November or December and payable to shareholders of record in such a month that is paid during the following January will be treated for U.S. federal income tax purposes as received by shareholders on December 31 of the calendar year in which it was declared. A taxable shareholder may wish to avoid investing in the Fund shortly before a dividend or other distribution, because the distribution will generally be taxable even though it may economically represent a return of a portion of the shareholder's investment.

If the Fund's distributions exceed its current and accumulated earnings and profits, all or a portion of the distributions made in the taxable year may be treated as a return of capital to shareholders. A return of capital distribution generally will not be taxable but will reduce the shareholder's cost basis and result in a higher capital gain or lower capital loss when the shares on which the distribution was received are sold. After a shareholder's basis in the shares has been reduced to zero, distributions in excess of earnings and profits will be treated as gain from the sale of the shareholder's shares.

The Fund's shareholders will be notified annually by the Fund (or its administrative agent) as to the federal tax status of all distributions made by the Fund. Distributions may be subject to state and local taxes. Shareholders who have not held Fund Shares for a full year should be aware that the Fund may report and distribute to a shareholder, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the Fund's ordinary income or net capital gain, respectively, actually earned during the shareholder's period of investment in the Fund.

A sale of Shares or redemption of Creation Units in the Fund may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of Shares will be treated as capital gain or loss if the Shares are capital assets in the shareholder's hands, and will be long-term capital gain or loss if the Shares have been held for more than 12 months, and short-term capital gain or loss if the Shares are held for 12 months or less. However, if shares on which a shareholder has received a net capital gain distribution are subsequently sold, exchanged, or redeemed and such shares have been held for six months or less, any loss recognized will be treated as a long-term capital loss to the extent of the net capital gain distribution. In addition, the loss realized on a sale or other disposition of shares will be disallowed to the extent a shareholder repurchases (or enters into a contract or option to repurchase) shares within a period of 61 days (beginning 30 days before and ending 30 days after the disposition of the shares). This loss disallowance rule will apply to shares received through the reinvestment of dividends during the 61-day period. In such a case, the basis of the newly purchased Shares will be adjusted to reflect the disallowed loss.

The cost basis of Shares acquired by purchase will generally be based on the amount paid for the Shares and then may be subsequently adjusted for other applicable transactions as required by the Internal Revenue Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

An Authorized Participant who exchanges securities for Creation Units generally will recognize gain or loss from the exchange. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units and the exchanger's basis in the Creation Units. The Internal Revenue Service (the "IRS"), however, may assert that an Authorized Participant that does not mark-to-market its holdings may not be permitted to currently deduct losses realized upon an exchange of securities for Creation Units under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

Any gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year and were held as capital assets in the hands of the exchanging Authorized Participant. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the Shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses. Any loss realized upon a redemption of Creation Units held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gains with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

The Trust on behalf of the Fund has the right to reject an order for a purchase of shares of the Fund if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to Section 351 of the Internal Revenue Code, the Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund, the purchaser (or a group of purchasers) may not recognize gain or loss upon the exchange of securities for Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rule applies and when a loss may be deductible.

The Fund (or its administrative agent) must report to the IRS and furnish to Fund shareholders the cost basis information for purchases of Fund shares. In addition to reporting the gross proceeds from the sale of Fund shares, the Fund (or its administrative agent) is also required to report the cost basis information for such shares and indicate whether these shares have a short-term or long-term holding period. For each sale of its shares, the Fund will permit its shareholders to elect from among several IRS-accepted cost basis methods, including average cost. In the absence of an election, the Fund will use the default cost basis method that has been communicated to you separately. The cost basis method elected by shareholders (or the cost basis method applied by default) for each sale of the Fund's shares may not be changed after the settlement date of each such sale of the Fund's shares. Shareholders should consult their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about cost basis reporting. Shareholders also should carefully review any cost basis information provided to them and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

U.S. individuals with adjusted gross income (subject to certain adjustments) exceeding certain threshold amounts (\$250,000 if married and filing jointly or if considered a “surviving spouse” for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases) are subject to a 3.8% Medicare contribution tax on all or a portion of their “net investment income.” This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains (including capital gain distributions and capital gains realized on the sale of Shares of the Fund or the redemption of Creation Units), among other categories of income, are generally taken into account in computing a shareholder’s net investment income.

Taxation of Fund Investments. Certain of the Fund’s investments may be subject to complex provisions of the Internal Revenue Code (including provisions relating to hedging transactions, straddles, integrated transactions, foreign currency contracts, forward foreign currency contracts, and notional principal contracts) that, among other things, may affect the Fund’s ability to qualify as a RIC, affect the character of gains and losses realized by the Fund (i.e., may affect whether gains or losses are ordinary or capital), accelerate recognition of income to the Fund and defer losses and, in limited cases, subject the Fund to U.S. federal income tax on income from certain of its foreign securities. To the extent the Fund invests in an underlying fund that is taxable as a RIC, the following discussion regarding the tax treatment of complex securities will also apply to the underlying funds that also invest in such complex securities and investments. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require the Fund to mark to market certain types of positions in its portfolio (i.e., treat them as if they were closed out) which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the RIC Distribution Requirement and for avoiding excise taxes. Accordingly, in order to avoid certain income and excise taxes, the Fund may be required to liquidate its investments at a time when the investment adviser might not otherwise have chosen to do so. The Fund intends to monitor its transactions, intends to make appropriate tax elections, and intends to make appropriate entries in its books and records in order to mitigate the effect of these rules and preserve its qualification for treatment as a RIC.

If the Fund acquires any equity interest in certain foreign investment entities (i) that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties, or capital gains) or (ii) where at least 50% of the corporation’s assets (computed based on average fair market value) either produce or are held for the production of passive income (“passive foreign investment companies” or “PFICs”), the Fund will generally be subject to one of the following special tax regimes: (i) the Fund may be liable for U.S. federal income tax, and an additional interest charge, on a portion of any “excess distribution” from such foreign entity or any gain from the disposition of such shares, even if the entire distribution or gain is paid out by the Fund as a dividend to its shareholders; (ii) if the Fund were able and elected to treat a PFIC as a “qualified electing fund” or “QEF,” the Fund would be required each year to include in income, and distribute to shareholders in accordance with the distribution requirements set forth above, the Fund’s pro rata share of the ordinary earnings and net capital gains of the PFIC, whether or not such earnings or gains are distributed to the Fund; or (iii) the Fund may be entitled to mark-to-market annually shares of the PFIC, and in such event would be required to distribute to shareholders any such mark-to-market gains in accordance with the distribution requirements set forth above. The Fund intends to make the appropriate tax elections, if possible, and take any additional steps that are necessary to mitigate the effect of these rules. The Fund may limit and/or manage its holdings in passive foreign investment companies to limit its tax liability or maximize its return from these investments.

If the Fund invests in certain zero coupon securities or any other securities that are sold at original issue discount and thus do not make periodic cash interest payments, the Fund will be required to include as part of its current income the imputed interest on such obligations even though the Fund has not received any interest payments on such obligations during that period.. However, the Fund must distribute to its

shareholders, at least annually, all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), including such accrued income, to qualify for treatment as a RIC under the Internal Revenue Code and avoid U.S. federal income and excise taxes. Therefore, the Fund may have to dispose of its portfolio securities, potentially under disadvantageous circumstances, to generate cash, or may have to borrow cash, to satisfy distribution requirements. Such a disposition of securities may potentially result in additional taxable gain or loss to the Fund and may affect the amount and timing of distributions from the Fund.

Any market discount recognized on a bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value or adjusted issue price if issued with original issue discount. Absent an election by the Fund to include the market discount in income as it accrues, gain on the Fund's disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount.

The Fund may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to any investments in those countries. Any such taxes would, if imposed, reduce the yield on or return from those investments. Tax conventions between certain countries and the U.S. may reduce or eliminate such taxes in some cases. If more than 50 percent of the value of the Fund's total assets at the close of any taxable year consists of certain foreign securities, then the Fund will be eligible to and intends to file an election with the IRS that may enable shareholders, in effect, to receive either the benefit of a foreign tax credit, or a deduction from such taxes, with respect to any foreign and U.S. possessions income taxes paid by the Fund, subject to certain limitations. Pursuant to the election, the Fund will treat those taxes as dividends paid to its shareholders. Each such shareholder will be required to include a proportionate share of those taxes in gross income as income received from a foreign source and must treat the amount so included as if the shareholder had paid the foreign tax directly. The shareholder may then either deduct the taxes deemed paid by him or her in computing his or her taxable income or, alternatively, use the foregoing information in calculating any foreign tax credit they may be entitled to use against the shareholders' federal income tax. If the Fund makes the election, the Fund (or its administrative agent) will report annually to its shareholders the respective amounts per share of the Fund's income from sources within, and taxes paid to, foreign countries and U.S. possessions.

Foreign tax credits, if any, received by the Fund as a result of an investment in another RIC (including an ETF which is taxable as a RIC) will not be passed through to you unless the Fund qualifies as a "qualified fund-of-funds" under the Code. If the Fund is a "qualified fund-of-funds" it will be eligible to file an election with the IRS that will enable the Fund to pass along these foreign tax credits to its shareholders. The Fund will be treated as a "qualified fund-of-funds" under the Code if at least 50% of the value of the Fund's total assets (at the close of each quarter of the Fund's taxable year) is represented by interests in other RICs.

Backup Withholding. The Fund will be required in certain cases to withhold (as "backup withholding") at a 28% withholding rate and remit to the U.S. Treasury the withheld amount of taxable dividends paid to any shareholder who (1) fails to provide a correct taxpayer identification number certified under penalty of perjury; (2) is subject to backup withholding by the IRS for failure to properly report all payments of interest or dividends; (3) fails to provide a certified statement that he or she is not subject to backup withholding; or (4) fails to provide a certified statement that he or she is a U.S. person (including a U.S. resident alien). The backup withholding rate is 28%.

Foreign Shareholders. Foreign shareholders (*i.e.*, nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term

capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of shares of the Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Under legislation generally known as “FATCA” (the Foreign Account Tax Compliance Act), the Fund is required to withhold 30% of certain ordinary dividends it pays, and, after December 31, 2018, 30% of the gross proceeds of share redemptions and certain Capital Gain Dividends it pays, to shareholders that fail to meet prescribed information reporting or certification requirements. In general, no such withholding will be required with respect to a U.S. person or non-U.S. individual that timely provides the certifications required by the fund or its agent on a valid IRS Form W-9 or applicable IRS Form W-8, respectively. Shareholders potentially subject to withholding include foreign financial institutions (“FFIs”), such as non-U.S. investment funds, and non-financial foreign entities (“NFFEs”). To avoid withholding under FATCA, an FFI generally must enter into an information sharing agreement with the IRS in which it agrees to report certain identifying information (including name, address, and taxpayer identification number) with respect to its U.S. account holders (which, in the case of an entity shareholder, may include its direct and indirect U.S. owners), and an NFFE generally must identify and provide other required information to the Fund or other withholding agent regarding its U.S. owners, if any. Such non-U.S. shareholders also may fall into certain exempt, excepted or deemed compliant categories as established by regulations and other guidance. A non-U.S. shareholder resident or doing business in a country that has entered into an intergovernmental agreement with the U.S. to implement FATCA will be exempt from FATCA withholding provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

A non-U.S. entity that invests in the Fund will need to provide the Fund with documentation properly certifying the entity’s status under FATCA in order to avoid FATCA withholding. Non-U.S. investors in the Fund should consult their tax advisors in this regard.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k)s, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income (“UBTI”). Under current law, the Fund generally serves to block UBTI from being realized by its tax-exempt shareholders. However, notwithstanding the foregoing, the tax-exempt shareholder could realize UBTI by virtue of an investment in the Fund where, for example: (i) the Fund invests in residual interests of Real Estate Mortgage Investment Conduits (“REMICs”), (ii) the Fund invests in a REIT that is a taxable mortgage pool (“TMP”) or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisor. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult their tax advisors regarding these issues.

Certain Potential Tax Reporting Requirements. Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file

with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance shareholders of a RIC are not excepted. A shareholder who fails to make the required disclosure to the IRS may be subject to substantial penalties. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

State Taxes. Depending upon state and local law, distributions by the Fund to its shareholders and the ownership of such shares may be subject to state and local taxes. Rules of state and local taxation of dividend and capital gains distributions from RICs often differ from the rules for federal income taxation described above. It is expected that the Fund will not be liable for any corporate excise, income or franchise tax in Delaware if it qualifies as a RIC for federal income tax purposes.

The Fund's shares held in a tax-qualified retirement account will generally not be subject to federal taxation on income and capital gains distributions from the Fund until a shareholder begins receiving payments from their retirement account.

The foregoing discussion is based on U.S. federal tax laws and regulations which are in effect on the date of this SAI. Such laws and regulations may be changed by legislative or administrative action. Shareholders are advised to consult their tax advisers concerning their specific situations and the application of federal, state, local and foreign taxes.

FINANCIAL STATEMENTS

As of the date of this SAI, the Fund had not commenced operations and, therefore, it does not have any financial statements.

APPENDIX A

Description of Short-Term Ratings

Description of certain short-term ratings assigned by Standard & Poor's Ratings Services ("S&P") and Moody's Investors Service ("Moody's"):

S&P

A-1 - A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are given a plus sign (+) designation. This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 - A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

Moody's

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by (a) leading market positions in well-established industries, (b) high rates of return on funds employed, (c) conservative capitalization structure with moderate reliance on debt and ample asset protection, (d) broad margins in earnings coverage of fixed financial charges and high internal cash generation, and (e) well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated **Prime-2** (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated **Prime-3** (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

Bond Ratings

Below is a description of Standard & Poor's Ratings Group ("Standard & Poor's") and Moody's Investors Service, Inc. ("Moody's") bond rating categories.

Standard & Poor's Ratings Group Corporate Bond Ratings

AAA - This is the highest rating assigned by Standard & Poor's to a debt obligation and indicates an extremely strong capacity to pay principal and interest.

AA - Bonds rated “AA” also qualify as high-quality debt obligations. Capacity to pay principal and interest is very strong, and in the majority of instances they differ from “AAA” issues only in small degree.

A - Bonds rated “A” have a strong capacity to pay principal and interest, although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than bonds in higher rated categories.

BBB - Bonds rated “BBB” are regarded as having an adequate capability to pay principal and interest. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay principal and interest for bonds in this category than for bonds in higher rated categories.

BB - Bonds rated “BB” have less near-term vulnerability to default than other speculative issues. However, they face major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments.

B - Bonds rated “b” have a greater vulnerability to default but currently have the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal.

CCC - Bonds rated “CCC” have a currently identifiable vulnerability to default and are dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, they are not likely to have the capacity to pay interest and repay principal.

Moody’s Investors Service, Inc. Corporate Bond Ratings

Aaa - Bonds rated “Aaa” are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to a “gilt-edged.” Interest payments are protected by a large or by an exceptionally stable margin, and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa - Bonds rated “Aa” are judged to be of high quality by all standards. Together with the Aaa group, they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protections may not be as large as in “Aaa” securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long term risk appear somewhat larger than in “Aaa” securities.

A - Bonds rated “A” possess many favorable investment attributes, and are to be considered as upper medium grade obligations. Factors giving security principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the future.

Baa - Bonds rated “Baa” are considered as medium grade obligations (*i.e.*, they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba - Bonds rated “Ba” are judged to have speculative elements. Their future cannot be considered as well

assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

APPENDIX B

Exchange Traded Concepts, LLC

PROXY VOTING POLICIES AND PROCEDURES

Introduction

Exchange Traded Concepts, LLC (“ETC”) recognizes that proxies for companies whose securities are held in client portfolios have an economic value, and it seeks to maximize that economic value by ensuring that votes are cast in a manner that it believes to be in the best interest of the affected clients. Proxies are considered client assets and are to be managed with the same care, skill and diligence as all other client assets.

Proxy Voting Policies

Proxy voting will be conducted by either ETC or the sub-advisers.² To the extent that ETC is responsible for proxy voting, ETC has engaged Institutional Shareholder Services (“ISS”), to provide research on proxy matters and voting recommendations, and to cast votes on behalf of ETC. ISS executes and maintains appropriate records related to the proxy voting process, and ETC has access to those records. ETC maintains records of differences, if any, between this Policy and the actual votes cast. ETC may, in the future, decide to engage a different proxy advisory firm.

ETC has reviewed ISS’s voting guidelines and has determined that those guidelines provide guidance in the best interest of ETC’s clients. This Policy and ISS’s proxy voting guidelines will be reviewed at least annually. This review will include, but will not necessarily be limited to, any proxy voting issues that may have arisen or any material conflicts of interest that were identified and the steps that were taken to resolve those conflicts.

There may be times when ETC believes that the best interests of the client will be better served if ETC votes a proxy counter to ISS’s guidelines pertaining to the matter to be voted upon. In those cases, ETC will generally review the research provided by ISS on the particular issue, and it may also conduct its own research or solicit additional research from another third party on the issue. After considering this information and, as necessary, discussing the issue with other relevant parties, ETC will determine how to vote on the issue in a manner which ETC believes is consistent with this Policy and in the best interests of the client.

Each sub-adviser’s proxy voting policies and procedures have been approved by the Trusts’ Board and when a sub-adviser has been delegated authority to vote a proxy, it will vote such proxy in accordance with the approved proxy voting policies and procedures.

In addition, the sub-advisers may engage the services of an independent third party (“Proxy Firm”) to cast proxy votes according to the sub-advisers’ established guidelines. ETC has deemed in the best interest of clients to permit a sub-adviser the authority to cast proxy votes in accordance with the proxy voting policies submitted by that firm and approved by the Trusts’ Board. The sub-adviser must promptly notify ETC of any proxy votes that are not voted consistently with the guidelines set forth in its policy.

Conflict of Interest Identification and Resolution

Although ETC does not believe that conflicts of interest will generally arise in connection with its proxy voting policies, ETC seeks to minimize the potential for conflict by utilizing the services of ISS to provide voting recommendations that

² As of the date of the last revision to this Policy, ETC’s only clients are the series (or portfolios) of Exchange Traded Concepts Trust, Exchange Listed Funds Trust, and ETF Series Solutions (the “Trusts”) for which ETC serves as investment adviser. ETC has engaged one or more sub-advisers for such series. For some series, ETC is responsible for voting proxies and, for the remaining series, a sub-adviser is responsible for proxy voting.

are consistent with relevant regulatory requirements. Occasions may arise during the analysis and voting process in which the best financial interests of clients might conflict with the interests of ISS. ISS has developed a “separation wall” as security between its proxy recommendation service and the other services it and its affiliated companies provide to clients who may also be a portfolio company for which proxies are solicited.

In resolving a conflict, ETC may decide to take one of the following courses of action: (1) determine that the conflict or potential conflict is not material, (2) request that disclosure be made to clients for whom proxies will be voted to disclose the conflict of interest and the recommended proxy vote and to obtain consent from such clients, (3) ETC may vote the proxy or engage an independent third-party or fiduciary to determine how the proxies should be voted, (4) abstain from voting or (5) take another course of action that adequately addresses the potential for conflict. Employees are required to report to the CCO any attempted or actual improper influence regarding proxy voting.

ETC will provide clients a copy of the complete Policy. ETC will also provide to clients, upon request, information on how their securities were voted.

Proxy Voting Operational Procedures

Reconciliation Process

Each account’s custodian provides holdings to ISS on a daily basis. Proxy materials are sent to ISS, which verifies that materials for future shareholder meetings are received for each record date position. ISS researches and resolves situations where expected proxy materials have not been received. ISS also notifies ETC of any proxy materials received that were not expected.

Voting Identified Proxies

A proxy is identified when it is reported through the ISS automated system or when a custodian bank notifies ISS of its existence. As a general rule, ETC votes all proxies that it is entitled to vote that are identified within the solicitation period. ETC may apply a cost-benefit analysis to determine whether to vote a proxy. For example, if ETC is required to re-register shares of a company in order to vote a proxy and that re-registration process imposes trading and transfer restrictions on the shares, commonly referred to as “blocking,” ETC generally abstains from voting that proxy.

Although not necessarily an exhaustive list, other instances in which ETC may be unable or may determine not to vote a proxy are as follows: (1) situations where the underlying securities have been lent out pursuant to an account’s participation in a securities lending program and the cost-benefit ETC analysis indicates that the cost to recall the security outweighs the benefit; (2) instances when proxy materials are not delivered or are delivered in a manner that does not provide ETC sufficient time to analyze the proxy and make an informed decision by the voting deadline; and (3) occasions when required local-market documentation cannot be filed and approved prior to the proxy voting deadline.

Proxy Oversight Procedures

In order to fulfill its oversight responsibilities related to the use of a proxy advisory firm, ETC will conduct a due diligence review of ISS annually and requests, at a minimum, the following information:

- ◆ ISS’ Policies, Procedures and Practices Regarding Potential Conflicts of Interest
- ◆ ISS’ Regulatory Code of Ethics
- ◆ The most recent SSAE 16 report of ISS controls conducted by an independent auditor (if available)
- ◆ ISS’ Form ADV Part 2 to determine whether ISS disclosed any new potential conflicts of interest

On a quarterly basis, ETC will request from ISS a certification indicating that all proxies were voted and voted in accordance with pre-determined guidelines and a summary of any material changes to the firm’s policies and procedures designed to address conflicts of interest. In addition, a Proxy Voting Record Report is reviewed by ETC on a periodic basis. The Proxy Voting Record Report includes all proxies that were voted during a period of time.

In order to fulfill its oversight responsibilities when a sub-adviser is responsible for voting proxies, ETC will request a certification of compliance and completion and review the sub-advisers’ Proxy Voting Record Report on a periodic basis.

Maintenance of Proxy Voting Records

The following records are maintained for a period of five years, with records being maintained for the first two years on site:

- These policy and procedures, and any amendments thereto;
- Each proxy statement (the majority of which are maintained on a third-party automated system);
- Record of each vote cast;
- Documentation, if any, created by ETC that was material to making a decision how to vote proxies on behalf of a client or that memorializes the basis for a decision;
- Various reports related to the above procedures; and
- Each written client request for information and a copy of any written response by ETC to a client's written or oral request for information.
