

Saba Closed-End Funds ETF (CEFS)

OVERVIEW

About the Fund

The **Saba Closed-End Funds ETF** (Bats: CEFS) is an actively managed ETF that seeks to generate high income by investing in closed-end funds trading at a discount to net asset value, and hedging the portfolio's exposure to rising interest rates.

CEFS offers access to Saba Capital's portfolio managers who have years of experience trading and hedging closed-end funds. Saba Capital's investment process includes proprietary models that dynamically rank closed-end funds across a variety of factors including yield, discount to NAV and quality of underlying securities. CEFS seeks to outperform index-based closed-end fund products by actively trading the portfolio in an attempt to capture the widening and narrowing of discounts to net asset value.

About Saba Capital

Saba Capital Management, L.P. ("Saba") is a registered investment adviser founded by Boaz Weinstein in April 2009. Saba is a lift-out of the Deutsche Bank proprietary credit trading group that Mr. Weinstein founded in 1998. Between 1998 and 2009, the group grew to become one of the largest investors in the credit markets and developed new strategies in capital structure arbitrage and relative value credit investing. At Saba, Mr. Weinstein leads a team of 41 professionals across New York and London; the senior members of the investment team have worked together for over ten years.

PERFORMANCE

	1 Month	3 Months	1 Year	Annualized Since Inception	Cumulative Since Inception
Net Asset Value (NAV)					0.65%
Market Price					1.46%

For the most recent performance information please visit www.sabaetf.com. The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative.

REASONS TO CONSIDER

- **Yield** : Closed-end funds trading at a discount to NAV typically offer higher yield and return potential.
- **Appreciation Potential**: Purchasing shares of closed-end funds at a discount to net asset value (NAV) may provide potential for appreciation.
- **Interest Rate Hedge**: CEFS employs hedging instruments in an attempt to mitigate the Fund's exposure to rising interest rates.
- **Diversification**: CEFS holds 25 closed-end funds diversified across asset classes and investment managers.
- **Active Management**: Daily investment decisions are made by portfolio managers with extensive backgrounds investing in closed-end funds who seek to capitalize on a wide range of opportunities, providing the potential to outperform.

†30-day SEC yield is a standard yield calculation developed by the SEC for fair comparison. It is based on the most recent month end and reflects the interest earned during the period after deducting the Fund's expenses for that period.

‡Acquired fund fees and expenses reflect the fund's pro rata share of the indirect fees and expenses incurred by investing in one or more acquired funds.

NAV returns are based on the fund's net asset value which represents the fund's net assets (assets less liabilities) divided by the fund's outstanding shares. **Market Price** returns are based on the midpoint of the bid/ask spread on the stock exchange on which shares of the fund are listed for trading as of the time that the fund's NAV is calculated. **Discount to NAV** occurs when an underlying fund's market price is below its NAV. **Yield** represents the average yield of closed-end fund holdings and is calculated using Yield to Worst ("YTW") methodology. **Leverage** is the use of various financial instruments or borrowed capital to increase the potential return of an investment. Leverage shown is the midpoint of the leverage range shown in the prospectus. This expected leverage will be shown until the fund begins to employ leverage. At inception fund leverage was 0%. Portfolio information represents the weighted average of all holdings in the CEFS portfolio.

Carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. This material must be preceded or accompanied by a current summary or full prospectus. Investors should read it carefully before investing or sending money.

The fund lists and principally trades its shares on the BATS exchange.

Investing involves risk, including possible loss of principal. Investments in foreign securities may involve risks such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation. Because the Fund is a "fund of funds," its investment performance largely depends on the investment performance of the Underlying Funds in which it invests, and the Fund is subject to the risks associated with the Underlying Funds. Leverage may increase the risk of loss and cause fluctuations in the market value of the Fund's portfolio to have disproportionately large effects or cause the NAV of the Fund generally to decline faster than it would otherwise. Derivatives may be more sensitive to changes in market conditions, amplifying risks. The Fund may engage in writing covered call options, which may limit its opportunity to profit from an increase in the price of the underlying stock above the exercise price, but continues to bear the risk of a decline in the stock. A liquid market may not exist for options held by the Fund. While the Fund receives premiums for writing the call options, the price it realizes from the exercise of an option could be substantially below a stock's current market price. High-yield bonds have a higher risk of default or other adverse credit events, but have the potential to pay higher earnings over investment grade bonds. The higher risk of default, or the inability of the creditor to repay its debt, is the primary reason for the higher interest rates on high yield bonds.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Market performance is determined using the bid/ask midpoint at 4:00pm Eastern time. NAV return is determined using the daily calculated Net Asset Value (NAV).

Exchange Traded Concepts, LLC serves as the investment advisor. Saba Capital Management, L.P. serves as sub advisors to the fund and is responsible for all investment decisions. Foreside Funds Services, LLC serves as the distributor.
